				Flaws in traffic controller requirements definition process and/or training	
22				methodology	145
23				Lack of or poor communication quality	146
24				Lack of adherence to SOP in terms of communication between ATC and pilot / vehicle driver	148
27				Lack of adherence to the SOP in terms of PNF flight parameters / situation monitoring	140
25				or / and passive contribution to the PF duties	151
26				Takeoff without clearance	157
27				Landing without clearance	158
28				Lack of adherence to Rules of the Air - runway used for alternating take-offs and landings	160
20				Lack of adherence to ICAO Annex 14 SARPs. Poor or inefficient bird hazard reduction	100
29				procedure	162
30				Pilot tiredness - Inadequate workload distribution	167
31		1		Flaws in pilot requirements definition process and/or training methodology	168
32 33		+		Flaws in CRM training procedures Lack of adherence to the main CRM rules	263 264
34	1	+		Lack of adherence to the main CRM rules Lack of adherence to Rules of the Air - adherence to Controller clearance	296
35		1		Flaws in Airspace and Air Traffic planning procedures design process	323
36				Flaws in airport capacity management process	400
				Lack of adherence to SARPs included in ICAO Annex 14 in terms of airport fence	
37				integrity monitoring	401
38				Lack of adherence to SOP for take-off procedure in terms of time limitation for take- off preparation.	404
39				Taxiing without clearance	367
40				Pilot tiredness - Inadequate workload distribution	167
41				Flaws in pilot requirements definition process and/or training methodology	168
4.0				Poor application of T/O & RTO procedure, adherence to SOP, criteria for STOP	
42 43				decision Late rejected takeoff decision / initiation	207 368
44				Poor application of T/O & RTO procedure, adherence to SOP and AFM limitations	384
					_
44			Failure of the flight crew to apply all the braking systems		
1 2	20 Brakes not applied correctly	TO02B33	Failure of the flight crew to apply all the braking systems immediately after take-off rejection.	Pilot tiredness - Inadequate workload distribution	167

П					Lack of adherence to ICAO Annex 14 SARPs. Poor or inefficient bird hazard reduction	
17					procedure COMP (COMP)	162
					Lack of adherence to ICAO Annex 14 SARPs in terms of RWY mainternance - presence	3.5
18					of contaminations.	216
					Inadequate certification process and / or flaws in methodology concerning verification	
19					of the system / product compliance with requirements - Landing gear components	358
Ħ					Lack of adherence to SARPs included in ICAO Annex 14 in terms of airport fence	
20					integrity monitoring	401
					Inadequate certification process and / or flaws in methodology concerning verification	П
					of the system / product compliance with requirements - Engine systems and / or	
21 22			 		components Flaws in manufacturer quality control process - Engine systems and / or components	454 458
22					Flaws in aircraft system maintenance process definition - Engine systems and / or	436
23					components	463
24					Flaws in aircraft system maintenance process definition - Landing gear components.	377
25					Flaws in manufacturer quality control process - Landing gear components.	376
26					Pilot tiredness - Inadequate workload distribution	167
27					Flaws in pilot requirements definition process and/or training methodology	168
20					Poor application of T/O & RTO procedure, adherence to SOP, criteria for STOP	207
28 29					decision Poor application of T/O & RTO procedure, failure recognition and preparedness	207
30					Pilot tiredness - Inadequate workload distribution	167
31					Flaws in pilot requirements definition process and/or training methodology	168
31 32					Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, aircraft handling	168 388
32				Failure of the flight crew to apply all the braking systems	Poor application of T/O & RTO procedure, aircraft handling	388
32 1	14	Brakes not applied correctly	TO09B43	Failure of the flight crew to apply all the braking systems immediately after take-off rejection.	Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution	388 167
32 1 2	14	Brakes not applied correctly	TO09B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology	388 167 168
32 1 2 3	14	Brakes not applied correctly	TO09B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, braking initiation sequence	388 167 168 199
32 1 2	14	Brakes not applied correctly	TO09B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology	388 167 168
1 2 3 4	14	Brakes not applied correctly	T009B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, braking initiation sequence Wildlife incursion	388 167 168 199 5
1 2 3 4 5	14	Brakes not applied correctly	TO09B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, braking initiation sequence Wildlife incursion Bird strike Contaminated Runway Tire burst	388 167 168 199 5 34
32 3 4 5 6 7	14	Brakes not applied correctly	TO09B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, braking initiation sequence Wildlife incursion Bird strike Contaminated Runway Tire burst Flaws in maintenance technician / airworthiness specialist requirements definition	167 168 199 5 34 39 80
32 1 2 3 4 5 6	14	Brakes not applied correctly	T009B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, braking initiation sequence Wildlife incursion Bird strike Contaminated Runway Tire burst Flaws in maintenance technician / airworthiness specialist requirements definition process and/or training methodology	388 167 168 199 5 34 39
32 3 4 5 6 7	14	Brakes not applied correctly	TO09B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, braking initiation sequence Wildlife incursion Bird strike Contaminated Runway Tire burst Flaws in maintenance technician / airworthiness specialist requirements definition	167 168 199 5 34 39 80
32 3 4 5 6 7	14	Brakes not applied correctly	TO09B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, braking initiation sequence Wildlife incursion Bird strike Contaminated Runway Tire burst Flaws in maintenance technician / airworthiness specialist requirements definition process and/or training methodology Maintenance technician / airworthiness specialist tiredness - Inadequate workload	167 168 199 5 34 39 80
32 3 4 5 6 7	14	Brakes not applied correctly	TO09B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, braking initiation sequence Wildlife incursion Bird strike Contaminated Runway Tire burst Flaws in maintenance technician / airworthiness specialist requirements definition process and/or training methodology Maintenance technician / airworthiness specialist irredness - Inadequate workload distribution Lack of adherence to ICAO Annex 14 SARPs. Poor or inefficient bird hazard reduction procedure	167 168 199 5 34 39 80
1 2 3 4 5 6 7 8 9	14	Brakes not applied correctly	T009B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, braking initiation sequence Wildlife incursion Bird strike Contaminated Runway Tire burst Flaws in maintenance technician / airworthiness specialist requirements definition process and/or training methodology Maintenance technician / airworthiness specialist tiredness - Inadequate workload distribution Lack of adherence to ICAO Annex 14 SARPs. Poor or inefficient bird hazard reduction procedure Lack of adherence to ICAO Annex 14 SARPs in terms of RWY mainternance - presence	388 167 168 199 5 34 39 80 149 150
32 1 2 3 4 5 6 7 8	14	Brakes not applied correctly	T009B43		Poor application of T/O & RTO procedure, aircraft handling Pilot tiredness - Inadequate workload distribution Flaws in pilot requirements definition process and/or training methodology Poor application of T/O & RTO procedure, braking initiation sequence Wildlife incursion Bird strike Contaminated Runway Tire burst Flaws in maintenance technician / airworthiness specialist requirements definition process and/or training methodology Maintenance technician / airworthiness specialist irredness - Inadequate workload distribution Lack of adherence to ICAO Annex 14 SARPs. Poor or inefficient bird hazard reduction procedure	388 167 168 199 5 34 39 80 149

ESD 32	Incorrect presence of aircraft/vehicle	Code	Definition	Technology	Human	Organisation	System of
1	on runway in use Take-off instruction error by ATCO	TO32B611	ATCO gives inadequate take-off instructions to pilot, resulting in		11; 19; 22;	43; 44	Organisations 45; 50; 51; 52; 53; 56;
1	Take on instruction error by Areo	10325011	take-off while the runway is occupied		11, 13, 22,	73, 44	57; 58; 59; 60; 61; 62; 63
2	Inadequate communication with pilot	TO32B612	ATCO fails to communicate take-off instructions to pilot, resulting in take-off while the runway is occupied		11; 19; 22;	43; 44	45; 50; 51; 52; 53; 56; 57; 58; 59; 60; 61; 62; 63
3	Inadequate communication with pilot	TO32B412	ATCO fails to communicate the correct runway entry instructions and ensure correct read-back from the flight crew or vehicle driver, causing a runway incursion		11; 19; 22;	43; 44	45; 50; 51; 52; 53; 56; 57; 58; 59; 60; 61; 62; 63
4	Pilot failure to follow taxi route	TO32B421	Pilots or vehicle driver fail to follow the correct taxi route to the runway entry point, causing a runway incursion		11; 19; 22;	43; 44	45; 50; 51; 52; 53; 59; 60; 61; 62; 63
5	Pilot failure to follow runway entry	TO32B422	Pilots or vehicle driver fail to follow the runway entry instruction		11; 19; 22;	43; 44	45; 50; 51; 52; 53; 59;
6	instructions ATCO failure to recognise runway	TO32B41121	from ATCO, causing a runway incursion ATCO is not aware of a conflict on the runway and hence gives		11; 19; 22;	43; 44	60; 61; 62; 63 45; 50; 51; 52; 53; 56;
0	conflict	1032641121	runway entry instructions that cause a runway incursion		11, 19, 22,	45, 44	57; 59; 60; 61; 62; 63
7	ATCO misjudgement of runway separation	TO32B41122	ATCO is aware of a conflict but misjudges the runway separation and hence gives runway entry instructions that cause a runway incursion		11; 19; 22;	43; 44	45; 48; 50; 51; 52; 53; 54; 55; 56; 57; 59; 60; 61; 62; 63
8	Ground radar not present	TO32B411111	Ground radar is not installed at the airport or radar is not used by ATCO		11; 12; 19; 22;	43; 44	45; 46; 48; 50; 51; 52; 53; 56; 57; 59; 60; 61; 62; 63
9	Ground radar failure	TO32B411112	Ground radar fails to produce adequate position information on aircraft or vehicle		11; 12; 19; 22;	43; 44	45; 46; 48; 50; 51; 52; 53; 56; 57; 59; 60; 61;
10	Ineffective ATCO use of ground radar	TO32B411113	ATCO makes inappropriate use of ground radar, resulting in inadequate position information		11; 12; 19; 22;	43; 44	62; 63 45; 46; 48; 50; 51; 52; 53; 56; 57; 59; 60; 61;
11	Flight crew lost on airport	TO32B4111211	Pilots or vehcile driver lose knowledge of aircraft position and hence fail to supply adequate position report to ATCO		11; 12; 19; 22;	43; 44	62; 63 45; 46; 48; 50; 51; 52; 53; 56; 57; 59; 60; 61;
12	ATCO failure to clarify position reports	TO32B4111212	ATCO fails to clarify the incorrect position report by pilots or vehicle		11; 12; 19; 22;	43; 44	62; 63 45; 46; 48; 50; 51; 52;
	,, ,		driver			·	53; 56; 57; 59; 60; 61; 62; 63
13	Inadequate airport ATCO coordination	TO32B411122	Airport ATCO fails to communicate adequately with approach/ ground controller		11; 12; 19; 22; 23;	43; 44	45; 46; 47; 50; 51; 56; 57; 58; 59; 60; 61; 62; 63
14	Runway crossing movement	TO32B51	Aircraft or vehicle crosses runways to reach the terminal or another departure runway		11; 19; 22;	43; 44	45; 48; 50; 51; 52; 53; 59; 60; 61; 62; 63
15	Runway entry at intermediate location	TO32B52	Aircraft enters runway at intermediate location, which introduces the possibility of incursion ahead of other traffic		11; 19; 22;	43; 44	45; 48; 50; 51; 52; 53; 59; 60; 61; 62; 63
16	Alternating take-off and landing	TO32B53	Runway used for alternating take-offs and landings		11; 19;	43; 44	45; 50; 51; 56; 57; 59; 60; 62; 63
17	Incorrect runway entry point	TO32B54	Aircraft enters the end of a wrong runway, or enters runway unintendedly through an intermediate taxiway or intersection		11; 19; 22;	43; 44	45; 48; 50; 51; 52; 53; 56; 57; 59; 60; 61; 62; 63
18	Pilot failure to follow take-off instructions	TO32B62	Pilots fail to follow the take-off instruction from the ATCO, resulting in take-off while the runway is occupied		11; 19; 22;	43; 44	45; 50; 51; 52; 53; 58; 59; 60; 61; 62; 63
19	RIMCAS not present	TO32B21	Runway Conflict Warning system is not installed or not in operation at the time		11; 12; 19; 22; 23;	43; 44	45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57;
20	RIMCAS failure to give warning in time	TO32B22	Runway Conflict Warning system fails to alert ATCO in time of a conflict		11; 12; 19; 22; 23;	43; 44	58; 59; 60; 61; 62; 63 45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
21	Controller failure to respond to RIMCAS warning	TO32B23	ATCO is alerted to the conflict but fails to give response to the warning		11; 12; 19; 22; 23;	43; 44	45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57;
22	Controller failure to resolve conflict in time	TO32B24	ATCO is alerted of the conflict but fails to resolve the conflict in time		11; 12; 19; 22; 23;	43; 44	58; 59; 60; 61; 62; 63 45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57;
	Low visibility prevents conflict detection	TO32B111	ATCO fails to detect a conflict and give warning due to low visibility		11; 12; 19; 22; 23;	43; 44	58; 59; 60; 61; 62; 63 45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57;
24	Darkness prevents conflict detection	TO32B112	ATCO fails to detect a conflict and give warning due to darkness		11; 12; 19; 22; 23;	43; 44	58; 59; 60; 61; 62; 63 45; 46; 47; 48; 50; 51;
25	Restricted view from tower prevents	TO32B113	ATCO fails to detect a conflict and give warning due to the		11; 12; 19; 22; 23;	43; 44	52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63 45; 46; 47; 48; 50; 51;
26	conflict detection ATCO failure to see visible aircraft in	TO32B114	restricted view from tower ATCO fails to detect a conflict and give warning due to ATCO's		11; 12; 19; 22; 23;	43; 44	52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	time		failure to see the aircraft			45, 44	45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
27	ATCO failure to resolve conflict in time	TO32B115	ATCO fails to warn the flight crew and provide a resolution of the conflict in time		11; 12; 19; 22; 23;	43; 44	45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
28	Aircraft using runway	TO32B3	Given a runway incursion, another aircraft is present on the runway, thus creating a conflict		11; 12; 19; 22; 23;	43; 44	45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
29	Avoidance essential	TO32C3	Given ATC failure to resolve a conflict, action by the flight crew or vehicle driver is necessary to avoid a runway collision		11; 12; 19; 22; 23;	43; 44	45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
30	Ineffective avoidance by intruding aircraft/vehicle	TO32B12	Flight crew from the intruding aircraft or driver of the intruding vehicle fails to avoid the collision		11; 12; 19; 22; 23;	43; 44	45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57;
31	Ineffective avoidance by impeded aircraft	TO32B13	Flight crew from the impeded aircraft fails to avoid the collision		11; 12; 19; 22; 23;	43; 44	58; 59; 60; 61; 62; 63 45; 46; 47; 48; 50; 51; 52; 53; 54; 55; 56; 57;

Base events	Code	Definition	SPIs: Technology	SPIs: Human	SPIs: Organisation	SPIs: System of Organisations
1 Ground agent error in moving equipment	TO36F11111	Deviation from procedures in positioning or moving equipment (e.g. vehicle, steps, baggage loader etc) by ground agent		12; 19;	44	46; 48; 50; 51; 52; 54; 55; 58; 59; 60; 62; 63
2 Ground equipment fault	TO36F11112	Deviation from procedures in positioning or moving equipment (e.g. vehicle, steps, baggage loader etc) due to equipment fault		12; 19;	44	46; 50; 51; 59; 60; 62; 63
		(e.g. brake failure)				
3 Ground movement deviation conflicts with aircraft	TO36F1112	Deviation from procedures in positioning or moving equipment (e.g. vehicle, steps, baggage loader etc) causes imminent collision with aircraft		12; 19;	44	46; 48; 50; 51; 52 54; 55; 59; 60; 62
4 Flight crew braking error allows movement while parked	TO36F11211	Flight crew fail to set brakes or maintain idle thrust, resulting in movement of parked aircraft		12; 19;	44	46; 50; 51; 54; 55 59; 60; 61; 62; 63
5 Movement of other aircraft deviates from procedures	TO36F11212	Other aircraft being pushed back or taxied nearby deviates from the intended trajectory		12; 19;	44	46; 48; 50; 51; 52 54; 55; 58; 59; 60 62; 63
6 Aircraft deviation creates conflict	TO36F1122	Deviation from the intended trajectory by the aircraft causes imminent collision		12; 19;	44	46; 48; 50; 51; 59 61; 62; 63
7 Inadequate pushback clearance	TO36F1211	Inadequate pushback clearance by ATC, e.g. failure to give information on passing traffic		12; 19;	44	46; 50; 51; 52; 53 60; 61; 62; 63
8 Pushback equipment fault	TO36F1212	Deviation from intended pushback trajectory due to equipment fault (e.g. towbar failure)		12; 19;	44	46; 50; 51; 59; 60 62; 63
9 Ground crew error in pushback	TO36F1213	Deviation from intended pushback trajectory due to ground crew error		12; 19;	44	46; 50; 51; 59; 60 62; 63
O Ineffective ground crew - flight crew communication	TO36F1214	Deviation from intended pushback trajectory due to ineffective communication between ground crew and flight crew		12; 19;	44	46; 50; 51; 54; 55 59; 60; 61; 62; 63
1 Pushback deviation creates conflict	TO36F122	Deviation from the intended pushback trajectory causes imminent collision		12; 19;	44	46; 50; 51; 59; 60 62; 63
2 Inadequate ground movement clearance or communication	TO36F1311	Inadequate ground movement clearance or communication by ATC during taxi-out, e.g. failure to communicate the extent to which a clearance implies obstacle clearance		12; 19;	44	46; 50; 51; 52; 53 55; 56; 57; 58; 59 61; 62; 63
3 Ground crew error in marshalling off stand	TO36F1312	Deviation from intended taxi trajectory due to marshalling error		12; 19;	44	46; 50; 51; 52; 5 60; 62; 63
4 Flight crew misjudgement of separation in taxi	TO36F1313	Deviation from intended taxi-out trajectory due to flight crew misjudgement of separation		12; 19;	44	46; 48; 50; 51; 5 54; 55; 59; 60; 6 63
5 Movement of other aircraft deviates from procedures	TO36F1314	Deviation from intended taxi trajectory by another taxiing aircraft		12; 19;	44	46; 48; 50; 51; 5 59; 60; 61; 62; 6
6 Taxi-out deviation creates conflict with aircraft	TO36F132	Deviation from the intended taxi-out trajectory causes imminent collision		12; 19;	44	46; 48; 50; 51; 5 59; 60; 61; 62; 6
7 Inadequate ground movement clearance or communication	TO36F1411	Inadequate ground movement clearance or communication by ATC during taxi-in, e.g. clearance for taxiway unsuitable for aircraft		12; 19;	44	46; 48; 50; 51; 5 54; 55; 59; 60; 6
8 Inadequate stand allocation	TO36F1412	Allocation of wrong stand for aircraft			44	50; 51; 52; 53; 54 59; 60; 61; 62; 6
9 Aircraft fault causes deviation in taxi-in	TO36F14131	Deviation from intended taxi-in trajectory due to aircraft fault (e.g. brake failure)	5; 7; 9;	12; 19;	44	46; 50; 51; 54; 5 59; 60; 61; 62; 6
O Flight crew handling error in taxi-in	TO36F14132	Deviation from intended taxi-in trajectory due to flight crew handling error		12; 19;	44	46; 51; 54; 55; 5 60; 61; 62; 63
1 Flight crew violation of taxi procedures	TO36F14133	Deviation from intended taxi-in trajectory due to flight crew procedural violation		12; 19;	44	46; 51; 59; 60; 6 63
2 Ground crew error marshalling onto stand	TO36F14134	Deviation from intended taxi-in trajectory due to marshalling error		12; 19;	44	46; 48; 50; 51; 5 54; 55; 59; 60; 6 63
Ground agent error in moving equipment	TO36F14141	Deviation from intended taxi-in trajectory due to ground agent error in moving equipment		12; 19;	44	46; 48; 50; 51; 5 54; 55; 59; 60; 6 63
4 Ground equipment fault	TO36F14142	Deviation from intended taxi-in trajectory due to ground equipment fault		12; 19;	44	46; 50; 51; 59; 6 62; 63
5 Taxi-in deviation creates conflict	TO36F142	Deviation from the intended taxi-in trajectory causes imminent collision		12; 19;	44	46; 48; 50; 51; 5 61; 62; 63
6 Avoidance impracticable for flight crew	TO36B21	Conflict cannot be avoided by flight crew	5; 7; 9;	12; 19;	44	46; 48; 50; 51; 5 54; 55; 56; 57; 5 60; 61; 62; 63
7 Conflict virtually invisible from flight deck	TO36B22	Flight crew fail to avoid conflict because point of conflict (e.g. wing tip) cannot be seen from the flight deck	5; 7; 9;	12; 19;	44	46; 48; 50; 51; 5 54; 55; 56; 57; 5 60; 61; 62; 63
8 Flight crew misjudgement of clearance	TO36B23	Flight crew fail to avoid conflict because they misjudge the clearance	5; 7; 9;	12; 19;	44	46; 48; 50; 51; 5 54; 55; 56; 57; 5 60; 61; 62; 63
9 Flight crew slow response to conflict	TO36B24	Flight crew fail to avoid conflict because they respond too slowly when they become aware of the conflict	5; 7; 9;	12; 19;	44	46; 48; 50; 51; 5 54; 55; 56; 57; 5
0 Avoidance impracticable for ground crew	TO36B11	Conflict cannot be avoided by ground crew	5; 7; 9;	12; 19;	44	60; 61; 62; 63 46; 48; 50; 51; 5 54; 55; 56; 57; 5
1 Conflict virtually invisible from tug	TO36B12	Ground crew fail to avoid conflict because point of conflict (e.g. wing tip) cannot be seen from the tug	5; 7; 9;	12; 19;	44	60; 61; 62; 63 46; 48; 50; 51; 5 54; 55; 56; 57; 5
2 Inadequate monitoring by ground crew	TO36B13	Ground crew fail to avoid conflict because they are not monitoring the clearance	5; 7; 9;	12; 19;	44	60; 61; 62; 63 46; 48; 50; 51; 5 54; 55; 56; 57; 5
T. Control of the Con	1		1	1	1	60; 61; 62; 63

	Base events	Code	Definition	SPIs: Technology	SPIs: Human	SPIs: Organisation	SPIs: System of Organisations
	Base events	Code	Definition	Technology	Human	Organisation	System of
_	Incorrect configuration						Organisations
	Unsuccessful TO configuration checklist	TO05B111	Co-pilot fails to determine the position of the flap and slats required		13; 22;	38; 41;	50; 51; 54; 55; 58;
2	Unsuccessful Checklist Verification	TO05B112	for a successful take-off Captain fails to identify the incorrect position of the flap and slats		13; 22;	38; 41;	60; 61; 62; 63 50; 51; 54; 55; 58; 5
			determined by co-pilot				60; 61; 62; 63
	Flap & slat positions entered into FMC incorrectly	TO05B12	Co-pilot fails to enter the correct flap and slat settings into the FMC that the aircraft is incorrectly configured prior to push-back from		13; 22;	38; 41;	50; 51; 54; 55; 58; 5 60; 61; 62; 63
			the stand				
4	Verification not conducted	TO05B21	Captain fails to perform the take-off configuration check prior to the application of take-off power		13; 22;	38; 41;	50; 51; 54; 55; 58; 56; 60; 61; 62; 63
5	Verification unsuccessful	TO05B22	Captain performs the take-off configuration check but fails to notice		13; 22;	38; 41;	50; 51; 54; 55; 58;
П	Take-off configuration warning		that the aircraft is configured incorrectly.				60; 61; 62; 63
6	Unsuccessful Manufacture	TO05B311	TOCW system fails due to unsuccessful manufacture and hence the take-off is not rejected	3;	13; 22;	38; 41;	50; 51; 54; 55; 58; 60: 61: 62: 63
7	Unsuccessful Maintenance	TO05B312	TOCW system fails due to unsuccessful maintenance and hence the	3;	13; 22;	38; 41;	50; 51; 54; 55; 58;
	Unsuccessful Operation	TO05B313	take-off is not rejected TOCW system fails because the flight crew operate it incorrectly.		13; 22;	38; 41;	60; 61; 62; 63 50; 51; 54; 55; 58;
8	Unsuccessful Operation	10058313	This includes the failure of the flight crew to check that the TOCW is		13; 22;	38; 41;	60; 61; 62; 63
			working prior to taxi or the failure of the crew to reset the TOCW				
9	Unsuccessful Manufacture	TO05B321	circuit breaker following testing TOCW power supply fails due to unsuccessful manufacture and	2;	13; 22;	38; 41;	50; 51; 54; 55; 58;
10	Unsuccessful Maintenance	TO05B322	hence the take-off is not rejected TOCW power supply fails due to unsuccessful maintenance and	2;	13; 22;	38; 41;	60; 61; 62; 63 50; 51; 54; 55; 58;
10	Offsuccessful Maintenance	10036322	hence the take-off is not rejected	۷,	13, 22,	36, 41,	60; 61; 62; 63
	Aircraft takes-off with incorrect configuration	TO05B33	Aircraft is still able to take-off even with the incorrect configuration		13; 22;	38; 41;	50; 51; 54; 55; 58; 60; 61; 62; 63
	Flight crew rejects take-off						60, 61, 62, 63
12	Pilot Misdiagnosis	TO05B411	The pilot misdiagnoses the situation and misunderstands the warning and allows the aircraft to reach V1 before incorrectly		13; 22;	38; 41;	50; 51; 54; 55; 58; 60; 61; 62; 63
			aborting the take-off				
13	Pilot Misjudgement	TO05B412	The pilot diagnoses the TOCW but misjudges the situation and allows the aircraft to reach V1 before incorrectly aborting the take-		13; 22;	38; 41;	50; 51; 54; 55; 58; 60; 61; 62; 63
			off				
	Take-off rejected correctly when below V1	TO05B42	If the take-off is rejected when the aircraft is below V1 then this is a success, but it must be included to obtain the pivotal event		13; 22;	38; 41;	50; 51; 54; 55; 58; 60; 61; 62; 63
			probability.				00, 01, 02, 03
	Failure to achieve maximum braking Insufficient Runway Length	TO05B51	The runway is too short under wet or icy runway conditions for the		13; 22;	38; 41;	48; 50; 51; 54; 55
13	maunicient nunway tength	1003831	plane to come to a halt even if the take-off is aborted before V1 is		13, 22,	30, 41,	59; 60; 61; 62; 63
16	Brakes not functioning correctly	TO05B52	reached. Brakes are not giving maximum braking, e.g. because of improper	7; 9;	13; 22;	38; 41;	50; 51; 54; 55; 58
10	brakes not functioning correctly	1003632	maintenance and damages	7, 9,	13, 22,	36, 41,	60; 61; 62; 63
17	Brakes not applied correctly	TO05B53	Failure of the flight crew to apply all the braking systems immediately after take-off rejection.		13; 22;	28; 29; 30; 38; 41;	50; 51; 54; 55; 58 60; 61; 62; 63
٧	Aircraft stalls after rotation		ininediately after take-on rejection.				60, 61, 62, 63
17	Brakes not applied correctly	TO05B53	Failure of the flight crew to apply all the braking systems	2; 3;	13; 22;	38; 41;	50; 51; 54; 55; 58 60; 61; 62; 63
19	Pilot ignores stickshaker	TO05B622	immediately after take-off rejection. Flight crew take no action to the activated stick-shaker	2; 3;	13; 22;	38; 41;	50; 51; 54; 55; 58
20	Stick shaker failure	TO05B6211	Stick-shaker fails due to improper manufacture or maintenance	2; 3;	13; 22;	38; 41;	60; 61; 62; 63 50; 51; 54; 55; 58
					13, 22,	36, 41,	60; 61; 62; 63
21	Stall AOA too low	TO05B6212	Stall occurs at an AOA that is less than the AOA required to activate the stick-shaker	2; 3; 6;	13; 22;	38; 41;	48; 50; 51; 54; 55 59; 60; 61; 62; 63
	Flight crew fails to regain control						39, 00, 01, 02, 03
22	Uncontrollable	TO05B71	No input to controls will allow the flight crew to maintain control of the aircraft.	2; 3; 6;	13; 22;	38; 41;	48; 50; 51; 54; 55 59; 60; 61; 62; 63
23	Lack of control	TO05B72	The pilot makes no attempt to control the aircraft.	2; 3; 6;	13; 22;	38; 41;	48; 50; 51; 54; 55
2/1	Incorrect Control	TO05B73	The pilot applies incorrect control to the aircraft. This can be due to	2-2-6-	13; 22;	38; 41;	59; 60; 61; 62; 63 48; 50; 51; 54; 55
			improper training, stress and fatigue	2, 3, 0,	13, 22,		59; 60; 61; 62; 63
25	Insufficient control	TO05B74	The pilot applies correct measures but are not enough to prevent aircraft leaving off the side of the runway	2; 3; 6;	13; 22;	38; 41;	48; 50; 51; 54; 55 59; 60; 61; 62; 63
	Pre-Service De-icing Failure						
1	Icing conditions	TO06B11	Condition of weather being conductive to ice accumulation on aircraft		13;	41;	48; 50; 51; 54; 55 60; 61; 62; 63
2	Aircraft already in service	TO06B121	Aircraft is already in service and hence will not undergo a pre-		13;	41;	48; 50; 51; 54; 55
3	Aircraft entering service	TO06B1221	service de-icing procedure Aircraft entering service and hence undergo a pre-service de-icing		13;	41;	60; 61; 62; 63 48; 50; 51; 54; 55
٥	Aircraft entering service		procedure				60; 61; 62; 63
4	Pre-Service de-icing failure	TO06B1222	Pre-service de-icing procedures are unsuccessful due to incompletion or failure to check and verify that the treated surfaces		13;	41;	48; 50; 51; 54; 55 60; 61; 62; 63
			are free of contaminants or unwanted effects caused by de-icing				00, 01, 02, 03
- 11	Pre-flight De-icing Failure				1		
	Lack of pre-flight ice inspection	TO06B211	Flight crew fail to perform a visual and tactile inspection, due to the		13;	41;	48; 50; 51; 54; 55
			crew's belief that the conditions are not conductive to icing, lack of expectation		1		60; 61; 62; 63
6	Unsuccessful pre-flight ice inspection	TO06B212	Flight crew perform a pre-flight inspection but the inspection is		13;	41;	48; 50; 51; 54; 55;
-	Desiring Failure	TO06B22	inadequate and the contamination is not observed Aircraft is not de-iced properly following the detection of		13;	41;	60; 61; 62; 63
′	De-icing Failure		contamination pre-flight		13;		48; 50; 51; 54; 55 60; 61; 62; 63
8	ATC Delay	TO06B231	Aircraft is delayed by ATC such that ice re-accumulates		13;	41;	48; 50; 51; 54; 55
9	Holdover properties inadequate	TO06B232	Properties of the de-icing/ anti-icing fluid are inappropriate such		13;	41;	60; 61; 62; 63 48; 50; 51; 54; 55;
			that the Holdover time (HOT) is less than the time required to take- off				60; 61; 62; 63
					13;	41;	48; 50; 51; 54; 55;
10	Severe Weather	TO06B233	Weather is severe enough such that ice accumulates rapidly		13,	41,	40, 30, 31, 34, 33,

11	Lack of observation	TO06B311	Flight crew fail to perform a visual inspection from inside the aircraft		13;	41;	48; 50; 51; 54; 55; 5 60; 61; 62; 63
12	Unsuccessful Observation	TO06B312	Flight crew are unable to see the contamination because they fail to observe correctly, the flight is in darkness or the ice is not visible		13;	41;	48; 50; 51; 54; 55; 5 60; 61; 62; 63
13	De-icing Failure	TO06B32	Aircraft is not de-iced properly following the detection of		13;	41;	48; 50; 51; 54; 55; 5 60; 61; 62; 63
14	ATC Delay	TO06B331	contamination post push-back Aircraft is delayed by ATC such that ice re-accumulates		13;	41;	48; 50; 51; 54; 55; 5
15	Holdover properties inadequate	TO06B332	Properties of the de-icing/ anti icing fluid are inappropriate such		13;	41;	60; 61; 62; 63 48; 50; 51; 54; 55; 5
16	Severe Weather	TO06B333	that the HOT is less than the time required to take-off Weather is severe enough such that ice accumulates rapidly		13;	41;	60; 61; 62; 63 48; 50; 51; 54; 55; 5
	Aircraft stalls after rotation	10000000	following de-icing/ anti-icing		13,	12)	60; 61; 62; 63
	Stall Unavoidable	TO06B41	No input to controls will allow the flight crew to avoid the stall		13;	41;	48; 50; 51; 54; 55; 5
18	Stick-Shaker failure	TO06B4211	Stick-shaker fails due to improper manufacture or maintenance		13;	41;	60; 61; 62; 63 48; 50; 51; 54; 55; 5
19	Stall AOA too low	TO06B4212	Stall occurs at an AOA that is less than the AOA required to activate		13;	41;	60; 61; 62; 63 48; 50; 51; 54; 55;
20	Pilot ignores stickshaker	TO06B422	the stick-shaker Flight crew take no action to the activated stick-shaker		13;	41;	60; 61; 62; 63 48; 50; 51; 54; 55;
	Flight crew fails to detect windshear				,	ŕ	60; 61; 62; 63
	LLWAS not installed	TO08B111	A low-level windshear alert system is not installed at the departure		22;	36; 37; 39;	48; 50; 51; 54; 55;
2	LLWAS not actiavted	TO08B112	airport, given that a windshear encounter occurs The LLWAS fails to activate, e.g. due to inadequacies in the		22;	36; 37; 39;	59; 60; 61; 62; 48; 50; 51; 54; 55;
			software used by the system to predict windshear or a failure of the system as a whole				59; 60; 61; 62;
3	Failure of ATC to advise pilot	TO08B113	ATC fails to advise the flight crew that there is a windshear		22;	36; 37; 39;	48; 50; 51; 54; 55; 59; 60; 61; 62;
4	PWS not installed	TO08B121	Aircraft does not have a predictive windshear system (PWS)		22;	36; 37; 39;	48; 50; 51; 54; 55;
5	PWS not activated	TO08B122	installed PWS fails to activate, e.g. due to inadequacies in the software used		22;	36; 37; 39;	59; 60; 61; 62; 48; 50; 51; 54; 55;
			by the system to predict windshear or a failure of the system as a whole				59; 60; 61; 62;
6	Crew fail to recognise windshear	TO08B13	Flight crew fail to recognise the symptoms of windshear and hence the windshear is not detected when there is no ground or airborne warning		22;	36; 37; 39;	48; 50; 51; 54; 55; 59; 60; 61; 62;
П	Flight crew fails to perform windshear		warning				
7	escape manoeuvre Failure to avoid windshear	TO08B21	Windshear is detected by any of the systems available but the		22;	36; 37; 39;	48; 50; 51; 54; 55;
8	Aircraft too low	TO08B221	aircraft cannot avoid the windshear Aircraft is too close to the ground immediately after take-off and		22;	36; 37; 39;	59; 60; 61; 62; 48; 50; 51; 54; 55;
			the windshear encountered is such that is impossible to successfully perform and execute a windshear escape manoeuvre				59; 60; 61; 62;
9	Pilot fails to execute a WEM	TO08B222	Following detection, the flight crew fails to execute and complete a successful windshear escape manoeuvre (WEM)		22;	36; 37; 39;	48; 50; 51; 54; 55; 59; 60; 61; 62;
	Flight crew fails to maintain control	T000004				25.27.20	
	Uncontrollable	TO08B31	No input to controls will allow the flight crew to maintain control of the aircraft.		22;	36; 37; 39;	48; 50; 51; 54; 55; 5 59; 60; 61; 62;
11	Lack of control	TO08B32	The pilot makes no attempt to control the aircraft.		22;	36; 37; 39;	48; 50; 51; 54; 55; 5 59; 60; 61; 62;
12	Incorrect control	TO08B33	The pilot applies incorrect control to the aircraft. This can be due to improper training, stress and fatigue		22;	36; 37; 39;	48; 50; 51; 54; 55; 5 59; 60; 61; 62;
13	Insufficient control	TO08B34	The pilot applies correct measures but are not enough to prevent aircraft leaving off the side of the runway		22;	36; 37; 39;	48; 50; 51; 54; 55; ! 59; 60; 61; 62;
	Fire on-board aircraft	ER11B11		9;			
	Cargo in Hightened Flammable State		The cargo on board has an increased likelihood of combusting, which can be caused by incorrect stowage or incorrect containment in the case of flammable cargo				50; 51; 54; 55; 58; 60; 61; 62; 63
2	Foreign Object Damage results in fuel leak	ER11B1211	Foreign objects strike aircraft and cause damage that leads to fuel leak	4;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 55; 58; 59; 60; 61; 63
3	Unsuccessful Maintenance Revealed	ER11B1212	A leak of fuel from the fuel system, due to previous unsuccessful maintenance	4;			50; 51; 55; 56; 59; 61; 62; 63
4	Unsuccessful Fuel Transfer	ER11B1213	A fault or error during fuel transfer prior to the flight that, when ignited, results in a fire in flight	4;			50; 51; 55; 56; 59; 61; 62; 63
5	Flammable Vapour in Fuel Tank	ER11B122	Excessive flammable vapour within in the fuel tank that, when	4;			50; 51; 55; 56; 59;
-	Hydraulic Fluids in Hightened	ER11B13	ignited, results in an explosion within the tank A leak of hydraulic fluid that, when ignited, results in a fire in flight	5;			61; 62; 63 50; 51; 55; 56; 59;
							61; 62; 63 50; 51; 55; 56; 59; 6
6	Flammable State Aircraft Equipment in Hightened	ER11B14	Components parts of aircraft that are unusually vulnerable to fire,	2; 7;			
6		ER11B14	Components parts of aircraft that are unusually vulnerable to fire, e.g. incorrectly inflated tyres, incorrectly installed wiring, inadequately specified insulation.	2; 7;			61; 62; 63
7	Aircraft Equipment in Hightened	ER11B14 ER11B15	e.g. incorrectly inflated tyres, incorrectly installed wiring,	2; 7; 9;			50; 51; 55; 56; 59; 6
7	Aircraft Equipment in Hightened Flammable State		e.g. incorrectly inflated tyres, incorrectly installed wiring, inadequately specified insulation.				50; 51; 55; 56; 59; 6 61; 62; 63 50; 51; 55; 56; 59; 6
6 7 8	Aircraft Equipment in Hightened Flammable State Engine Overheats	ER11B15	e.g. incorrectly inflated tyres, incorrectly installed wiring, inadequately specified insulation. Any part of the engine overheats, causing a fire	9;			50; 51; 55; 56; 59; 6 61; 62; 63 50; 51; 55; 56; 59; 6 61; 62; 63 50; 51; 55; 56; 59; 6
6 7 8 9	Aircraft Equipment in Hightened Flammable State Engine Overheats APU Overheats	ER11B15 ER11B16	e.g. incorrectly inflated tyres, incorrectly installed wiring, inadequately specified insulation. Any part of the engine overheats, causing a fire The auxiliary power unit (APU) overheats, causing a fire	9; 9;			50; 51; 55; 56; 59; 61; 62; 63 50; 51; 55; 56; 59; 61; 62; 63
6 7 8 9 10	Aircraft Equipment in Hightened Flammable State Engine Overheats APU Overheats Electrical Event results in Ignition Excessive Heat Transfer results in Ignition	ER11B15 ER11B16 ER11B21	e.g. incorrectly inflated tyres, incorrectly installed wiring, inadequately specified insulation. Any part of the engine overheats, causing a fire The auxiliary power unit (APU) overheats, causing a fire ignition is caused by an electrical fault	9; 9;			50; 51; 55; 56; 59; 61; 62; 63 50; 51; 55; 56; 59; 61; 62; 63 50; 51; 55; 56; 59; 61; 62; 63
6 7 8 9 10 111 III	Aircraft Equipment in Hightened Flammable State Engine Overheats APU Overheats Electrical Event results in Ignition Excessive Heat Transfer results in	ER11B15 ER11B16 ER11B21	e.g. incorrectly inflated tyres, incorrectly installed wiring, inadequately specified insulation. Any part of the engine overheats, causing a fire The auxiliary power unit (APU) overheats, causing a fire ignition is caused by an electrical fault	9; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	50; 51; 55; 56; 59; 61; 62; 63 50; 51; 55; 56; 59; 61; 62; 63 50; 51; 55; 56; 59; 61; 62; 63 50; 51; 55; 56; 59; 61; 62; 63 50; 51; 55; 56; 59; 61; 62; 63 45; 50; 51; 52; 53; 55; 56; 59; 61; 62; 63

18	Fire Extinction System not Activated	ER11B42	An operating fire extinction system is installed at the location of the fire, but the flight crew fails to activate the system	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 54; 55; 56; 58; 59; 60; 61; 62; 63
19	Flight Crew misinterpret Systems Warning	ER11B431	Flight crew misdiagnose the cause of the fire warning, and hence delay the fire suppression	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 54; 55; 56; 58; 59; 60; 61;
20	Flight Crew misinterpret Sensory Warnings	ER11B432	Flight crew attribute warning, e.g. burning smell, to an incorrect non-dangerous source	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	62; 63 45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61
21	Incorrect Operation of Fire Extinction System	ER11B44	Flight crew are aware of the fire but fail to operate the fire extinguishing system correctly and hence the fire is not	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	62; 63 45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61
22	Fire Extinction System Insufficient	ER11B45	extinguished Flight crew operate the fire extinguishing system correctly but the system is not sufficient to extinguish the fire	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	62; 63 45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61 62; 63
23	Fire Extinction Impractical	ER11B46	Once detected the fire propagates rapidly such that extinction is impractical	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61 62; 63
	Fire propagates Fire fed by Original Flammable Source	ER11B51	The fire is not contained because it is fed by the continuing original source, e.g. fuel tank	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61
25	Fire fed by Secondary Flammable Sources	ER11B52	The fire is not contained because it is fed by a source other than that which started it	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	62; 63 45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61 62; 63
26	Fire has Catastrophic Explosive Effects	ER11B53	The explosion is not contained by the surrounding structure	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61 62; 63
	Flight crew fail to maintain control Flight Control Surfaces Inoperable	ER11B611	Flight control surfaces are inoperable, such that the flight crew cannot control the aircraft	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61 62; 63
28	Aircraft Structural Integrity Failure	ER11B612	Parts of the aircraft detach so that it becomes uncontrollable	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61 62; 63
29	Flight Crew Incapacitated	ER11B613	The flight crew are overcome by fire/smoke, so that they cannot control the aircraft	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61 62; 63
6	Lack of Control	ER11B62	The pilot makes no attempt to control the aircraft after the fire propagates, e.g. due to distraction	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 63 62; 63
31	Incorrect Control	ER11B63	The pilot applies incorrect control to the aircraft after the fire propagates, e.g. due to improper training, stress and fatigue	2; 3; 4; 5; 7; 9;	11; 15; 16; 18; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 43; 44	45; 50; 51; 52; 53; 54 55; 56; 58; 59; 60; 61 62; 63
	Flight crew fails to maintain control ADI failure in flight	ER12B311	Attitude displayed by the attitude director indicator (ADI) is incorrect. This covers failures of the PF's ADI sufficient to induce spatial disorientation.	3;	13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
10	No ADI cross-check by pilot	ER12B3121	Given failure of a single ADI in flight, that the PF does not detect the failure by cross-checking against other ADIs.		13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
11	Multiple ADI failure	ER12B3122	Given failure of at least one ADI in flight, that the other ADIs also fail.	3;	13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
12	Disorientating manoeuvre	ER12C1	Aircraft flies a manoeuvre involving combined changes in acceleration and bank/pitch angles, likely to induce spatial disorientation.		13; 14; 15; 16; 23;	36; 37; 38; 39; 41; 42;	48; 50; 51; 54; 55; 58 59; 60; 61; 62; 63
13	ADI not used by pilot	ER12B321	Given a disorientating manoeuvre, that the PF does not use the ADI to maintain spatial orientation.		13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
14	Instrument meteorological conditions	ER12B41	Given an undiagnosed ADI failure or disorientating manoeuvre, that the aircraft is in cloud or fog.		13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
15	Dark sky and terrain	ER12B42	Given an undiagnosed ADI failure or disorientating manoeuvre in visual meteorological conditions (VMC), that the aircraft is in darkness, with no moon, and no significant lights over the terrain.		13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
16	Autopilot not capable of required manoeuvre	ER12B51	Given an undiagnosed ADI failure or disorientating manoeuvre, that the autopilot is not capable of performing the manoeuvre required at the time.		13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
17	Flight crew training in manual flight	ER12B521	Given an undiagnosed ADI failure or disorientating manoeuvre, that the autopilot is not in use at the time in order to provide crew training in manual flight		13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
	Flight crew preference for manual flight	ER12B522	Given an undiagnosed ADI failure or disorientating manoeuvre, that the autopilot is not in use at the time because the flight crew prefer manual flight		13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
	·	ER12B523	Given an undiagnosed ADI failure or disorientating manoeuvre, that the autopilot is not in use at the time because the flight crew do not know how to use it for the required manoeuvre		13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
	Autopilot incorrectly used by flight crew	ER12B53	Given an undiagnosed ADI failure or disorientating manoeuvre, that the flight crew are unsuccessfully trying to use the autopilot at the time.		13; 14;	41; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
	Flight crew member spatially disorientated						
1	Recovery impractical	ER12B11	Given an extreme attitude is executed, there is no practical recovery action possible.	3;	13; 14; 15; 16; 23;	36; 37; 38; 39; 41; 42;	48; 50; 51; 54; 55; 58 59; 60; 61; 62; 63
2	Lack of recovery action	ER12B12		3;	13; 14; 15; 16; 23;	36; 37; 38; 39; 41; 42;	48; 50; 51; 54; 55; 58 59; 60; 61; 62; 63
3	Incorrect recovery action	ER12B13	Given an extreme attitude where recovery is attempted, that the flight crew's attempted recovery is incorrect.	3;	13; 14; 15; 16; 23;	36; 37; 38; 39; 41; 42;	48; 50; 51; 54; 55; 58 59; 60; 61; 62; 63
4	Insufficient recovery action	ER12B14	flight crew's attempted recovery is incorrect. Given an extreme attitude where recovery is attempted using the correct action, that the flight crew's action is insufficient to regain control.	3;	13; 14; 15; 16; 23;	36; 37; 38; 39; 41; 42;	48; 50; 61; 62; 63 48; 50; 51; 54; 55; 58 59; 60; 61; 62; 63
5	Lack of attitude monitoring	ER12B21	Given an extreme attitude is commanded by the PF, there is no monitoring by the pilot not flying (PNF).	3;	13; 14; 15; 16; 23;	36; 37; 38; 39; 41; 42;	48; 50; 51; 54; 55; 58 59; 60; 61; 62; 63
6	Failure of attitude monitoring	ER12B22	Given an extreme attitude is commanded by a PF being monitored by the PNF, the PNF does not recognise the command is incorrect.	3;	13; 14; 15; 16; 23;	36; 37; 38; 39; 41; 42;	48; 50; 51; 54; 55; 58 59; 60; 61; 62; 63

			CATS ESD base Events and 05 ASC				
7	Failure to communicate warning	ER12B23	Given an extreme attitude is commanded by a PF and is recognised as incorrect by the PNF, the PNF fails to communicate with the PF.	3;	13; 14; 15; 16; 23;	36; 37; 38; 39; 41; 42;	48; 50; 51; 54; 55; 58 59; 60; 61; 62; 63
8	Lack of response to warning	ER12B24	Given an extreme attitude is commanded by a PF that is challenged by the PNF, that the PF does not correct it in time to prevent an extreme attitude developing.	3;	13; 14; 15; 16; 23;	36; 37; 38; 39; 41; 42;	48; 50; 51; 54; 55; 58 59; 60; 61; 62; 63

_ 1	Flight crew fails to maintain control		thrust reverser failure				60; 61; 62; 63
1	Recovery impractical	ER13B11	FCS failure is too severe, too rapid or the flight stage too critical for any effective recovery action	1; 3; 5; 9;	13; 14; 15; 16; 18; 19; 21; 22;	26; 31; 35; 38; 41; 42;	47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
2	Lack of recovery action	ER13B12	No recovery is attempted in time to recover control. This may be due to failure to recognise the FCS failure	1; 3; 5; 9;		26; 31; 35; 38; 41; 42;	47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
3	Incorrect recovery action	ER13B13	Attempted recovery action is incorrect. This may be due to flight crew not trained in control recovery from severe FCS failure	1; 3; 5; 9;		26; 31; 35; 38; 41; 42;	47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
4	Insufficient recovery action	ER13B14	Recovery action is correct but insufficient to recover control	1; 3; 5; 9;	13; 14; 15; 16; 18; 19;	26; 31; 35; 38; 41; 42;	47; 50; 51; 54; 55; 5
	Flight crew incapacitation				21; 22;		59; 60; 61; 62; 63
	· · · · · · · · · · · · · · · · · · ·	ER14F3	Flight crew incapacitates due to medical illness or injuries.		13; 15; 19; 20; 21;	31; 32; 34; 35; 41;	47; 50; 51; 59; 60; 6 62; 63
	response	ER14B2	Given the flight deck is depressurised, flight crew fails to response adequately and hence are incapacitated		13; 15; 19; 20; 21;	31; 32; 34; 35; 41;	47; 50; 51; 59; 60; 6 62; 63
6	Toxic gas in flight deck	ER14F51	Presence of toxic gas inside the flight deck		13; 15; 19; 20; 21;	31; 32; 34; 35; 41;	47; 50; 51; 59; 60; 6 62; 63
	Unsuccessful flight deck smoke procedures	ER14B3	Given the presence of toxic gas in flight deck, flight crew fails to response adequately and hence are incapacitated		13; 15; 19; 20; 21;	31; 32; 34; 35; 41;	47; 50; 51; 59; 60; 6 62; 63
		ER14F41111	The Cabin Pressure Control System (CPCS) fails during flight		13; 15; 19; 20; 21;	31; 32; 34; 35; 41;	47; 50; 51; 59; 60; 6 62; 63
9	Depressurisation	ER14F41112	Given a failure in CPCS, the flight deck is depressurised		13; 15; 19; 20; 21;	31; 32; 34; 35; 41;	47; 50; 51; 59; 60; 6 62; 63
	Depressurisation due to incorrect CPCS	ER14F4112	Flight deck is depressurised as a result of incorrect operation of the CPCS		13; 15; 19; 20; 21;	31; 32; 34; 35; 41;	47; 50; 51; 59; 60; 6 62; 63
\rightarrow	apa ara	ER14F41211	One or more of the aircraft doors fail during flight		15; 19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 54; 55; 5
12	Depressurisation	ER14F41212	Given a door failure, the flight deck is depressurised		15; 19; 20; 21;	31; 32; 33; 34; 35;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 5
13	Window failure in flight	ER14F41221	One or more of the aircraft window fail during flight		15; 19; 20; 21;	31; 32; 33; 34; 35;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 5
14	Depressurisation	ER14F41222	Given a window failure, the flight deck is depressurised		15; 19; 20; 21;	31; 32; 33; 34; 35;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 5
15	Fuselage failure due to deterioration	ER14F41231	Fuselage fails as a result of deterioration		15; 19; 20; 21;	31; 32; 33; 34; 35;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 5
16	Fuselage failure due to bird strike	ER14F41232	Fuselage fails as a result of bird strike		15; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 5
17	Fuselage failure due to tail strike	ER14F41323	Rear of fuselage strike the runway during take-off or landing		15; 19; 20; 21;	37; 38; 39; 31; 32; 33; 34; 35;	59; 60; 61; 62; 63 47; 49; 50; 51; 54; 5
	Fuselage failure due to impact while on		Impact damage while on the ground, due to taxi collision, ground			31; 32; 33; 34; 35; 43;	58; 59; 60; 61; 62; 6 45; 46; 47; 48; 50; 5
	ground	ERITI 41324	vehicle impact, etc.		11, 12, 13, 13, 20, 21,	44	52; 53; 54; 55; 56; 5 58; 59; 60; 61; 62; 6
	Flight crew fails to maintain control	ED44D44	All flights are selfer as in a shaking at the		14. 12. 12. 15. 10. 20.	24. 22. 22. 24. 25. 26.	
	Simultaneous incapacitation of all flight crew	EK14B11	All flight crew suffer an incapacitation at the same time		11; 12; 13; 15; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 41; 43; 44	45; 46; 47; 48; 49; 5 51; 52; 53; 54; 55; 5 57; 58; 59; 60; 61; 6
2	Lack of response to pilot incapacitation	ER14B12	Failure to recognise the Pilot flying (PF) is incapacitated, resulting in no appropriate action being taken in time to recover control of the aircraft		11; 12; 13; 15; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 41; 43; 44	63 45; 46; 47; 48; 49; 5 51; 52; 53; 54; 55; 5 57; 58; 59; 60; 61; 6
	Incorrect response to pilot incapacitation	ER14B13	Other flight crew recognise that PF is incapacitated but perform an incorrect response and are unable to recover control of the aircraft		11; 12; 13; 15; 19; 20; 21; 22;	31; 32; 33; 34; 35; 36; 37; 38; 39; 41; 43; 44	63 45; 46; 47; 48; 49; 5 51; 52; 53; 54; 55; 5 57; 58; 59; 60; 61; 6
	Ice accretion on aircraft	ED15D21	leing condition is not detected, due to failure of outcometi-	6.	12: 14: 21:	21. 41. 42.	
9	lcing conditions not detected	ER15B31	Icing condition is not detected, due to failure of automatic ice- detection, failure of flight crew to monitor airframe icing, or glaze ice is invisible to flight crew	6;	13; 14; 21;	31; 41; 42;	48; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
10	Anti-icing system not used	ER15B32	Anti-icing system is not operating due to flight crew misjudge the licing severity		13; 14; 21;	31; 41; 42;	48; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
11	Anti-icing system failure	ER15B33	Anti-icing system is not operational	6;	13; 14; 21;	31; 41; 42;	48; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
12	Anti-icing procedures not followed	ER15B34	Anti-icing procedure is not followed by the flight crew, i.e. failure to		13; 14; 21;	31; 40; 41; 42;	48; 50; 51; 54; 55; 5
13	Icing exceeding anti-icing capability	ER15B35	operate the system as intended Icing condition exceeds the capacity of the anti-icing system		13; 14; 21;	31; 41; 42;	59; 60; 61; 62; 63 48; 50; 51; 54; 55; 5

			CATS ESD base Events and 03 ASC	05 51 13			
	Flight into icing conditions	ER15F	Given there is unsuccessful ice protection, aircraft continues flight into icing condition		13; 14; 21;	31; 41; 42;	48; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
	Flight crew fails to respond Ice accretion not detected	ER15B21	No warning is delivered to alert the flight crew of ice accretion on	3; 6;	13; 14; 21;	31; 40; 41; 42;	48; 50; 51; 54; 55; 5
6	Lack of response to ice accretion	ER15B22	aircraft surface A warning is delivered but flight crew take no respond action	6;	13; 14; 21;	31; 40; 41; 42;	59; 60; 61; 62; 63 48; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
7	Incorrect response to ice accretion	ER15B23	A warning is delivered but flight crew's attempted action is incorrect	6;	13; 14; 21;	31; 40; 41; 42;	48; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
8	Insufficient response to ice accretion	ER15B24	A warning is delivered to alert flight crew. A correct respond action is attempted but not sufficient to remove the aircraft from icing condition	6;	13; 14; 21;	31; 40; 41; 42;	48; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
	Flight crew fails to maintain control Recovery impractical	ER15B11	Loss of control is too severe or the flight stage is too critical for any	3; 6;	13; 14; 21;	31; 40; 41; 42;	48; 50; 51; 54; 55; 5
2	Lack of recovery action	ER15B12	effective recovery action No recovery is attempted in time to recover control, despite there	3; 6;	13; 14; 21;	31; 40; 41; 42;	59; 60; 61; 62; 63 48; 50; 51; 54; 55; 5
3	Incorrect recovery action	ER15B13	being sufficient time for recovery Attempted action is incorrect. This may be because the flight crew	3; 6;	13; 14; 21;	31; 40; 41; 42;	59; 60; 61; 62; 63 48; 50; 51; 54; 55; 59; 60; 61; 62; 63
4	Insufficient recovery action	ER15B14	are not trained in control recovery Recovery action is correct but not enough to recover control	3; 6;	13; 14; 21;	31; 40; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
П	Flight instrument failure						
9	Pitot-static port covers not removed	ER16F3111	Anti-contamination covers of the pitot static tube are not removed before flight and affect the measurement of the airspeed and altitude		13; 14; 21; 22;	31; 41; 42;	50; 51; 54; 55; 58; 60; 61; 62; 63
10	Flight into icing conditions	ER16F	Aircraft flies into icing condition voluntarily or compulsorily		13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
11	Pitot-static ice protection system failure	ER16B31	lce protection system of the pitot-static system fails so that the port/ tube is blocked by ice		13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
	Pitot-static ice protection system not used	ER16B32	Ice protection system of the pitot static system is not used during flight so that the port/ tube is blocked by ice		13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
	Pitot-static system blocked by contamination	ER16F3113	Pitot static system is blocked by contamination, e.g. ash and insects	-	13; 14; 21;	31; 41; 42;	50; 51; 54; 55; 58; 60; 61; 62; 63
	Pitot-static system leak	ER16F3114	Leakage from the Pitot static system causes the system to return inadequate measurement	3;	13; 14; 21;	31; 41; 42;	50; 51; 54; 55; 58; 60; 61; 62; 63
	ASI anomaly	ER16F312	Given the pitot static system fails during flight, the ASI receives incorrect measurement and hence gives adequate information of airspeed and altitude		13; 14; 21;	31; 41; 42;	50; 51; 54; 55; 58; 9 60; 61; 62; 63
	ADI failure in flight	ER16F321	Attitude Director Indicator (ADI) fails during flight	3;	13; 14; 21;	31; 41; 42;	50; 51; 54; 55; 58; 50; 60; 61; 62; 63
	ASI anomaly	ER16F322	Given ADI fails during flight, the ASI receives incorrect measurement and hence fails to display adequate flight information	3;	13; 14; 21;	31; 41; 42;	50; 51; 54; 55; 58; ! 60; 61; 62; 63
	ASI failure in flight	ER16F331	ASI system fails during flight	3;	13; 14; 21;	31; 41; 42;	50; 51; 54; 55; 58; 60; 61; 62; 63
	ASI anomaly	ER16F332	Given ASI system fails during flight, it fails to display adequate flight information	3;	13; 14; 21;	31; 41; 42;	50; 51; 54; 55; 58; 60; 61; 62; 63
	PFD failure in flight	ER16F341	Primary Flight Display (PFD) system fails during flight	1;	22;		48; 50; 51; 54; 55; 59; 60; 61; 62; 63
	ASI anomaly Flight crew failure to maintain control	ER16F342	Given PFD fails during flight, ASI fails to display adequate flight information	1;	22;		48; 50; 51; 54; 55; 59; 60; 61; 62; 63
	Recovery impractical	ER16B11	Loss of control is too severe or the flight stage is too critical for any effective recovery action	1; 3;	13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
	Lack of recovery action	ER16B12	No recovery is attempted in time to recover control. This may be due to failure to recognise the FCS failure	1; 3;	13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
3	Incorrect recovery action	ER16B13	An attempted recovery is executed but the action is incorrect. This may be due to flight crew are not trained in control recovery from severe FCS failure	1; 3;	13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
4	Insufficient recovery action	ER16B14	The attempted recovery action is correct but insufficient to recover control	1; 3;	13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
5	Flight instrument failure not detected	ER16B21	The flight instrument failure is not detected as there is no cross check between flight crew or failure is not detectable through cross check	1; 3;	13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
6	Lack of response to flight instrument failure	ER16B22	Flight instrument failure is detected but no action is taken to recover reliable flight information	1; 3;	13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
	Incorrect response to flight instrument failure		Flight instrument failure is detected but the attempt to recover reliable flight information is incorrect	1; 3;	13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
8	Insufficient response to flight instrument failure	ER16B24	Flight instrument failure is detected. The attempt to recover reliable flight information is correct but not enough to make full recovery	1; 3;	13; 14; 21; 22;	31; 41; 42;	48; 50; 51; 54; 55; 59; 60; 61; 62; 63
	Aircraft encounters adverse weather Severe Clear Air Turbulence (CAT)	ER17B1111	Severe Clear Air Turbulence (CAT) occurs along the flight route of		13; 19; 21;	31; 33; 34; 35; 41;	47; 48; 50; 51; 54;
2	No indication of severe CAT	ER17B11121	the aircraft Encounter with severe CAT is completely unexpected		13; 19; 21;	31; 33; 34; 35; 41;	58; 59; 60; 61; 62; 47; 48; 50; 51; 54; 58: 59: 60: 61: 62:
3	Inadequate information from preceding aircraft	ER17B11122	Flight crew request information from the preceding aircraft but they either give inaccurate information concerning the weather		13; 19; 21;	31; 33; 34; 35; 41;	58; 59; 60; 61; 62; 47; 48; 50; 51; 54; 58; 59; 60; 61; 62;
4	Encounter too sudden	ER17B11123	picture or fail to give any information CAT is expected but the encounter is so sudden such that an avoidance is impractical		13; 19; 21;	31; 33; 34; 35; 41;	47; 48; 50; 51; 54; 58; 59; 60; 61; 62;
5	Unfavourable weather conditions	ER17B1121	Storm conditions or weather fronts along the flight route of the aircraft, severe enough to cause occupant injury, control upset or		13; 19; 21;	31; 33; 34; 35; 41;	47; 48; 50; 51; 54; 56; 57; 58; 59; 60;
6	Weather report information	ER17B112211	structural damage A weather report is obtained by the flight crew but the information		13; 19; 21;	31; 33; 34; 35; 41;	62; 63 47; 48; 50; 51; 54;
7	inadequate Flight crew fail to obtain weather reports	ER17B112212	is incorrect, resulting in a turbulence encounter Weather report is not obtained by flight crew and hence weather conditions are not anticipated correctly, resulting in a turbulence		13; 19; 21;	31; 33; 34; 35; 41;	58; 59; 60; 61; 62; 47; 48; 50; 51; 56; 59; 60; 61; 62; 63
8	Onboard weather radar failure	ER17B112213	encounter Failure of on board weather radar system, preventing weather		13; 19; 21;	31; 33; 34; 35; 41;	47; 48; 50; 51; 54;
9	Unsuccessful weather information management	ER17B112214	avoidance, resulting in a turbulence encounter Flight crew use the on board weather system incorrectly, resulting in a turbulence encounter		13; 19; 21;	31; 33; 34; 35; 40; 41;	58; 59; 60; 61; 62; 47; 48; 50; 51; 54; 58; 59; 60; 61; 62;
	Flight crew disregard weather	ER17B112215	Flight crew receive adequate weather information but do not		13; 19; 21;	31; 33; 34; 35; 41;	47; 48; 50; 51; 54; !
10	information		believe it, resulting in a turbulence encounter		1		58; 59; 60; 61; 62; 6

			T	I			
12	Flight crew unable to avoid unfavourable weather conditions	ER17B112222	Flight crew are unable to avoid flying into unfavourable weather, resulting in turbulence encounter		13; 19; 21;	31; 33; 34; 35; 41;	47; 48; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
13	Aircraft suffers severe upset	ER17B121	The aircraft suffers rapid changes in altitude, speed and attitude		13; 14; 19; 21;	31; 33; 34; 35; 41; 42;	47; 48; 50; 51; 54; 55;
1.4	Aircraft suffers structural damage	ER17B122	The aircraft suffers structural damage		21;	31;	58; 59; 60; 61; 62; 63
14	Aircraft Suriers Structural damage	EN1/B122	The aircraft suriers structural damage		21,	51,	48; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
15	No time to secure cabin	ER17B12311	The encounter is too sudden such that there is no time to secure		21;	31;	48; 50; 51; 54; 55; 58;
16	Flight crew fail to secure cabin	ER17B12312	the cabin Flight crew fail to alert the passengers and cabin crew as to the		21;	31;	59; 60; 61; 62; 63 48; 50; 51; 54; 55; 58;
10	riight crew fan to secure cabin	CK17B1Z51Z	necessity of securing the cabin		21,	51,	59; 60; 61; 62; 63
17	Unsuccessful securing of cabin	ER17B12313	An attempt is made to secure the cabin but this is unsuccessful		21;	31;	48; 50; 51; 54; 55; 58;
18	Occupants suffer significant injury	ER17B1232	Given that the cabin is not secured during the turbulence		14; 21;	31; 42;	59; 60; 61; 62; 63 48; 50; 51; 54; 55; 58;
			encounter, the passengers or cabin crew suffer significant injuries				59; 60; 61; 62; 63
	Ultimate design load exceeded Flight crew command extreme	ER17B211	During the encounter with adverse weather, the flight crew		13; 14; 19; 21;	31; 33; 34; 35; 40; 41;	47; 48; 50; 51; 54; 55;
	manoeuvre	EN175211	voluntarily execute an extreme manoeuvre		15, 11, 15, 11,	42;	56; 57; 58; 59; 60; 61;
20	Turbulence causes extreme manoeuvre	ED470242	The turbulence-induced motions cause an extreme manoeuvre		12: 14: 10: 21:	24. 22. 24. 25. 40. 44.	62; 63
20	Turbulence causes extreme manoeuvre	EK1/B212	The turbulence-induced motions cause an extreme manoeuvre		13; 14; 19; 21;	31; 33; 34; 35; 40; 41; 42;	47; 48; 50; 51; 54; 55; 56; 57; 58; 59; 60; 61;
							62; 63
21	Ultimate design load exceeded	ER17B22	Given an extreme manoeuvre, the aircraft design loads are exceeded, causing the break-up in-flight		13; 14; 19; 21;	31; 33; 34; 35; 40; 41; 42;	47; 48; 50; 51; 54; 55 56; 57; 58; 59; 60; 61
						,	62; 63
	Flight crew fail to maintain control Adverse weather makes aircraft	ER17B31	No input to controls will allow the flight crew to maintain control of		13; 14; 19; 21;	31; 33; 34; 35; 40; 41;	47; 48; 50; 51; 54; 55
22	uncontrollable	EK1/B31	the aircraft after the turbulence encounter		13; 14; 19; 21;	42;	56; 57; 58; 59; 60; 61
							62; 63
23	Lack of control	ER17B32	The pilot makes no attempt to control the aircraft after the turbulence encounter		13; 14; 19; 21;	31; 33; 34; 35; 40; 41; 42;	47; 48; 50; 51; 54; 55; 56; 57; 58; 59; 60; 61;
			tarbalence encounter			72,	62; 63
24	Incorrect control	ER17B33	The pilot applies incorrect or insufficient control to the aircraft,		13; 14; 19; 21;	31; 33; 34; 35; 40; 41;	47; 48; 50; 51; 54; 55
			after the aircraft encounters turbulence. This can be due to improper training, stress and fatigue			42;	56; 57; 58; 59; 60; 61 62; 63
	Single Engine Failure						
1	Reduction Gear Failure	ER18B1111	The failure of the reduction gear within the jet engine	9;		26; 27; 31; 33; 34; 35;	47; 50; 51; 54; 55; 58
2	Severe Failure	ER18B1112	A severe failure occurs given that the reduction gear fails	9;	21; 22; 13; 14; 16; 18; 19; 20;	36; 41; 42; 26; 27; 31; 33; 34; 35;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 58
					21; 22;	36; 41; 42;	59; 60; 61; 62; 63
3	Compressor Failure	ER18B1121	The failure of the compressor section within the jet engine.	9;	13; 14; 16; 18; 19; 20; 21; 22;	26; 27; 31; 33; 34; 35; 36; 41; 42;	47; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
4	Severe Failure	ER18B1122	A severe failure occurs given that the compressor fails	9;		26; 27; 31; 33; 34; 35;	47; 49; 50; 51; 54; 55;
		504004404			21; 22;	36; 41; 42;	58; 59; 60; 61; 62; 63
5	Combustor Failure	ER18B1131	The failure of the combustor section within the jet engine	9;	13; 14; 16; 18; 19; 20; 21; 22;	26; 27; 31; 33; 34; 35; 36; 41; 42;	47; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
6	Severe Failure	ER18B1132	A severe failure occurs given that the combustor fails	9;	13; 14; 16; 18; 19; 20;	26; 27; 31; 33; 34; 35;	47; 50; 51; 54; 55; 58;
7	Turbine Failure	ER18B1141	The failure of the turbine section within the jet engine	9;	21; 22; 13; 14; 16; 18; 19; 20;	36; 41; 42; 26; 27; 31; 33; 34; 35;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 58;
,	Turbine ranure	CK10B1141	The failure of the turbine section within the jet engine	3,	21; 22;	36; 41; 42;	59; 60; 61; 62; 63
8	Severe Failure	ER18B1142	A severe failure occurs given that the turbine fails	9;		26; 27; 31; 33; 34; 35;	47; 50; 51; 54; 55; 58;
9	Oil Distribution System Failure	ER18B1151	The oil distribution system within the jet engine fails leading to a	9;	21; 22; 13; 14; 16; 18; 19; 20;	36; 41; 42; 26; 27; 31; 33; 34; 35;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 58;
	on bistribution system runare		lack of lubrication of the rotating parts		21; 22;	36; 41; 42;	59; 60; 61; 62; 63
10	Severe Failure	ER18B1152	A severe failure occurs given that the oil distribution fails	9;		26; 27; 31; 33; 34; 35;	47; 50; 51; 54; 55; 58
11	Accessory Drive Failure	ER18B1161	The accessory drive within the jet engine fails preventing the	9;	21; 22; 13; 14; 16; 18; 19; 20;	36; 41; 42; 26; 27; 31; 33; 34; 35;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 58
			proper working of oil, hydraulic and fuel systems		21; 22;	36; 41; 42;	59; 60; 61; 62; 63
12	Severe Failure	ER18B1162	A severe failure occurs given that the accessory drive fails	9;	13; 14; 16; 18; 19; 20; 21; 22;	26; 27; 31; 33; 34; 35; 36; 41; 42;	47; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
13	Icing Conditions	ER18B12111	The occurrence of conditions conducive to icing as a percentage of	6; 9;		26; 31; 33; 34; 35; 36;	47; 48; 50; 51; 54; 55;
		50400404404	the total flight time The engine de-ice/anti-ice system fails		42.45.40.40.20.24	37; 38; 39; 41;	58; 59; 60; 61; 62; 63
14	Engine Anti-Ice Unavailable	ER18B121121	The engine de-ice/anti-ice system fails	6; 9;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 38; 39; 41;	47; 48; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
15	Engine Anti-Ice Utilisation Failure	ER18B121122	The engine de-ice/anti-ice system is not used or used incorrectly by	6; 9;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36;	47; 48; 50; 51; 54; 55;
16	Ice shed from wings enters engine	ER18B121123	flight crew Ice accumulated on wings enters the aircraft engine	9;	13; 16; 18; 19; 20; 21;	37; 38; 39; 41; 26; 31; 33; 34; 35; 36;	58; 59; 60; 61; 62; 63 47; 48; 50; 51; 54; 55;
_ 10	nee shed from wings enters engine	100121123	rec accommunica on wings enters the ancian engine	,	13, 10, 10, 13, 20, 21,	37; 38; 39; 41;	58; 59; 60; 61; 62; 63
17	Ice impact causes damage to engine	ER18B121131	Ice dislodges from the wing or the nacelle of the engine and	9;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36;	47; 48; 50; 51; 54; 55
			impacts upon the fan blades. The damage could also be caused by the impact of hail.			37; 38; 39; 41;	58; 59; 60; 61; 62; 63
18	Ice restricts airflow	ER18B121132	Ice build up within the engine restricts the flow of air into the	6; 9;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36;	47; 48; 50; 51; 54; 55
			combustor resulting in a fuel rich mixture within the combustor			37; 38; 39; 41;	58; 59; 60; 61; 62; 63
19	Thrust reduction	ER18B121133	leading to a flame-out lce either builds up on the fuel inlets reducing the flow of oil or	9;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36;	47; 48; 50; 51; 54; 55;
			builds up on the engine pressure ratio (EPR) pilot tubes giving false	,	. , , , , , , ,	37; 38; 39; 41;	58; 59; 60; 61; 62; 63
			& high EPR readings that the auto throttle system will counter by reducing the thrust.				
20	Severe storm conditions	ER18B12121	The occurrence of severe storm conditions as a percentage of the	6; 9;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36;	47; 48; 50; 51; 54; 55
			total flight time			37; 38; 39; 41;	58; 59; 60; 61; 62; 63
21	A/C unable to avoid storm	ER18B121221	The storm is too large to avoid or occurs rapidly leaving the flight crew with no time to respond	6; 9;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 38; 39; 41;	47; 48; 50; 51; 54; 55 58; 59; 60; 61; 62; 63
22	PIC commands flight into storm	ER18B121222	The pilot continues flight into the storm given that it could have	6; 9;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36;	47; 48; 50; 51; 54; 55
	Date acception of the control of the	ED40042477	been avoided	C: 0:	42-46-40-40-55-5	37; 38; 39; 41;	58; 59; 60; 61; 62; 63
23	Rain quantity exceeds operating limits of engine	ER18B121231	The storm conditions are too intense such that the engine cannot operate.	6; 9;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 38; 39; 41;	47; 48; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
24	Flight crew fails to maintain engine	ER18B121232	Flight crew fail to maintain a high enough engine rotational speed	6; 9;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36;	47; 48; 50; 51; 54; 55
	speed		(45% of maximum) such that the engine becomes saturated with			37; 38; 39; 41;	58; 59; 60; 61; 62; 63
25	Fuel System Maintenance Failure	ER18B122111	water. The fuel system is not correctly maintained which is revealed by the	4;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36;	47; 50; 51; 59; 60; 61
	-		in-flight failure of said system and the resulting fuel leak			37; 38; 39; 41;	62; 63
26	Fuel System Damaged	ER18B122112	The fuel system is damaged by another part of the aircraft or by a foreign object and is revealed in-flight by the leaking of fuel	4;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 38; 39; 41;	47; 50; 51; 54; 55; 58 59; 60; 61; 62; 63
	Fuel Distribution System Failure	ER18B1221211	Failure in fuel distribution system for the engine	4;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36;	47; 50; 51; 54; 55; 58
27	•	I				37; 38; 39; 41;	59; 60; 61; 62; 63
	Distribution Failure	ER18B1221212	The failure of the distribution system is severe enough that no fuel is transferred to one or more of the engines which eventually	4;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 38; 39; 41;	47; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63

	Control Surfaces in incorrect configuration	ER18B1221221	The flight control surfaces are in a high drag position either due to pilot actions or failure of the systems controlling them		13; 14; 16; 18; 19; 20; 21; 22;	26; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 50; 51; 54; 55; 58 59; 60; 61; 62; 63
6	Undercarriage Failure	ER18B1221222	The undercarriage in a high drag position either due to pilot actions or failure of the systems controlling it	7;	14; 23;	26; 42;	50; 51; 54; 55; 58; 59 60; 61; 62; 63
31	FCMC Failure	ER18B1222111	The Fuel Control Management Computers are dependent upon the fuel distribution system. If the fuel distribution system fails then the FCMCs will. The failure of the FCMCs will result in a warning being displayed upon the Electronic Central Advisory Monitor (ECAM) but no advisory that the fuel system might not be operable. As a result of this a fuel starvation problem might occur	3;	13; 14; 16; 18; 19; 20; 21; 22;	26; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 50; 51; 54; 55; 58 59; 60; 61; 62; 63
32	No ECAM	ER18B12221121	There is no Electronic Centralised Aircraft Monitor (ECAM) installed	3;	13; 15; 16; 17; 21;	26; 39;	50; 51; 54; 55; 58; 59
33	ECAM gives insufficient advisory action	ER18B12221122	insufficient to alert the flight crew to the severity of the fuel	3; 4;	13; 14; 16; 18; 19; 20; 21; 22;	26; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	60; 61; 62; 63 47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
34	ECAM Failure	ER18B12221123	problem A part of the ECAM system fails resulting in no warning being given	3; 4; 9;	13; 14; 16; 18; 19; 20; 21; 22;	26; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
35	Lack of monitoring	ER18B1222121	The flight crew fail to monitor the other fuel status flight instruments to determine whether or not there is a fuel problem	4;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 39; 41;	47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
36	Insufficient Monitoring	ER18B1222122	The flight crew do not carry out sufficient checks on the fuel status to fully identify the fuel problem	4;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 39; 41;	47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
37	Flight crew ignore independent checks	ER18B1222123	The flight crew make independent checks on the fuel status but do not believe that there is a problem	4;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 39; 41;	47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
38	Crew response inadequate	ER18B12222	The crew understand that a fuel problem will develop yet take	4;	13; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36;	47; 50; 51; 54; 55; 5
39	Foreign Object Damage	ER18B131	inappropriate actions to prevent fuel starvation The engine mount is struck by a foreign object. This can include but is not exclusive to birds and detachment of objects from the aircraft	9;	13; 16; 18; 19; 20; 21;	37; 39; 41; 26; 31; 33; 34; 35; 36; 37; 39; 41;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
40	Engine Mount Design Failure Revealed	ER18B1321	The design of the engine mount is inadequate and this is revealed during flight by the loading upon the mount	9;	13; 14; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 39; 41; 42;	47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
41	Engine Mount Maintenance Failure Revealed	ER18B1322	The maintenance of the engine mount is performed inadequately and this is revealed in flight by the loading on the mount	9;	13; 14; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 39; 41; 42;	47; 48; 50; 51; 54; 5 58; 59; 60; 61; 62; 6
42	Load exceeds engine mount design load	ER18B133		9;	13; 14; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 39; 41; 42;	47; 48; 50; 51; 54; 5 58; 59; 60; 61; 62; 6
43	Turbulent Conditions	ER18B141		9;	13; 14; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 39; 41; 42;	47; 48; 50; 51; 54; 5 58; 59; 60; 61; 62; 6
44	Flight crew command altitude outside engine operating envelope	ER18B142		9;	13; 14; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 39; 41; 42;	47; 48; 50; 51; 54; 5 58; 59; 60; 61; 62; 6
45	Engine Thrust too high for altitude	ER18B1431	The flight crew apply a thrust setting that is too high for the altitude at which the aircraft is operating leading to an aerodynamic stall and an unrecoverable compressor urge	9;	13; 14; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 39; 41; 42;	47; 48; 50; 51; 54; 5 58; 59; 60; 61; 62; 6
46	Rapid change in engine thrust	ER18B1432	The flight crew apply a rapid change in the thrust setting that leads to an aerodynamic stall and an unrecoverable compressor surge	9;	13; 14; 16; 18; 19; 20; 21;	26; 31; 33; 34; 35; 36; 37; 39; 41; 42;	47; 48; 50; 51; 54; 58; 59; 60; 61; 62;
	Flight crew fail to restart engine	5040004		24670			
47	Restart Unnecessary	ER18B21	Due to redundancy the restart of an engine is deemed unnecessary.	3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 55; 58; 59; 60; 61; 63
48	Aircraft too low to allow restart	ER18B221	The priority of the flight crew following an engine failure is to maintain control of the aircraft. If the aircraft is at a low altitude it will be impractical, due to the high workload, for the flight crew to attempt a restart whilst attempting to maintain control of the aircraft	3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 5 55; 58; 59; 60; 61; 6 63
49	Engine too damaged	ER18B222	The engines are too damaged for a restart to be practical	3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 55; 58; 59; 60; 61; 6
50	Engine not attached	ER18B223	The engines are not attached and a restart would hence be impossible	3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 55; 58; 59; 60; 61; 6
51	A/C System Failure prevents restart	ER18B231	The engine restart system fails and prevents a restart of the engine to be performed	3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 55; 58; 59; 60; 61; 63
52	Flight Crew unable to perform APU Restart	ER18B232	The flight crew are unable to perform an Auxiliary Power Unit (APU) restart either due to the flight crew performing the restart incorrectly or due to the engine not responding	3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51;
53	Restart not attempted	ER18B24	Given that the restart is necessary, the flight crew do not perform a restart	3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 55; 58; 59; 60; 61; 63
	Dual Engine Failure Severe Engine Damage	ER18B311	Damage on the second engine, caused by the first, is severe enough that second engine power is lost	3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 55; 58; 59; 60; 61;
55	Second Engine damaged by first	ER18B312	Debris from the first engine failure damages the second engine	3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	63 47; 48; 49; 50; 51; 55; 58; 59; 60; 61;
56	Single Engine suffers Ice Flame-out	ER18B32111	The first engine suffers an ice induced flame-out	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	63 47; 48; 49; 50; 51; 55; 58; 59; 60; 61;
57	Second Engine suffers Ice Flame-out	ER18B32112	The second engine suffers an ice induced flame-out	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	63 47; 48; 49; 50; 51; 55; 58; 59; 60; 61;
58	Single Engine suffers Rain Flame-out	ER18B32121	The first engine suffers a rain induced flame-out	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 55; 58; 59; 60; 61; 63
59	Second Engine suffers Rain Flame-out	ER18B32122	The second engine suffers a rain induced flame-out	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 55; 58; 59; 60; 61; 63
60	Single Engine suffers Fuel Exhaustion	ER18B3221	The first engine suffers fuel starvation	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 55; 58; 59; 60; 61; 63
61	Fuel starvation occurs simultaneously	ER18B32221	Given that the first engine suffers fuel starvation the second suffers an almost simultaneous starvation	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 55; 58; 59; 60; 61; 6
		ER18B32222	Given that the first engine suffers fuel starvation, the flight crew fail		13; 14; 15; 16; 17; 18;	26; 27; 31; 33; 34; 35;	47; 48; 49; 50; 51; 5

			CATS ESD Base Events and 63 ASC	000.15			
63	Crew response inadequate	ER18B32223	The crew understand that a fuel problem will develop yet take inappropriate actions to prevent fuel starvation	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
64	Single Engine separates	ER18B331	The first engine separates from the aircraft	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62
65	Second Engine struck by First Engine	ER18B3321	The first engine on separation strikes a second engine causing it to separate. It should be noted that this can only occur on a four	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62;
	Second Engine separates independently	ER18B3322	engine aircraft The second engine separation is independent of the first	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
67	Single Engine suffers surge	ER18B341	The first engine suffers a compressor surge	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	63 47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
68	Simultaneous surge	ER18B3421	Given that the first engine suffers a surge the second engine suffers an almost simultaneous one	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	63 47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
69	Second Engine surges independently	ER18B3422	A second engine surge occurs independently of the first	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	63 47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
70	Aircraft too low to allow restart	ER18B3511	The priority of the flight crew following an engine failure is to maintain control of the aircraft. If the aircraft is at a low altitude it will be impractical, due to the high workload, for the flight crew to attempt a restart whilst attempting to maintain control of the	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	63 47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62 63
71	Engines too damaged	ER18B3512	aircraft Both engines are severely damaged such that a power restart is not practically possible	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
72	Engines not attached	ER18B3513	Both engines are not attached to the aircraft body such that a power restart is not practically possible	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
73	No fuel	ER18B3514	There is no fuel so a power restart is not practically possible	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
74	A/C System Failure prevents restart	ER18B3521	The engine restart system fails and prevent a restart of the engine to be performed	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
	Flight Crew unable to perform APU Restart	ER18B3522	The flight crew are unable to perform an Auxiliary Power Unit (APU) restart either due to the flight crew performing the restart incorrectly or due to the engine not responding	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
	Flight Crew perform Incorrect Windmill Restart	ER18B3523	The flight crew do not obtain the correct speed and descent rate necessary for a windmill restart	6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62 63
IV	Flight crew shut down wrong engine						03
77	Engine Sensor Failures	ER18B41111	The flight crew are unable to determine which engine has failed due to a failure of the engine sensors	2; 3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62 63
78	Dual FWS Failure	ER18B41112	Both flight warning computers (FWC) fail and no warning is displayed by the ECAM	2; 3; 4; 6; 7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
79	DMC Failure	ER18B41113	The ECAM display monitoring computers (DMC) fail fails so no warning can be displayed	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
80	Warning not Obvious	ER18B4112	The warning given is not obvious to the flight crew	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 63
81	Engine Indication Systems Failure	ER18B41131	The engine indicating systems on aircraft without ECAM fails	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
82	Total Loss of engine indication	ER18B41132	The aircraft suffers a total loss of all engine indications	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62 63
83	Lack of Verification	ER18B4121	The flight crew fail to verify that an engine has failed	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62 63
84	Inadequate Verification	ER18B4122	The flight crew check to verify which engine has failed but fail to diagnose which one has failed	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62
85	Flight crew ignore warnings	ER18B42	The flight crew ignore the warnings relating the failed engine and shut down an operable engine	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62 63
_	Flight crew fails to maintain control						
	Flight Control Surfaces Severely Damaged	ER18B511	The aircraft is rendered uncontrollable due to damage to the flight control surfaces following a single engine failure	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 63
87	Aircraft Stalls	ER18B512	Due to the lack of thrust from one engine the aircraft is unable to maintain the speed required to generate sufficient lift and the aircraft stalls	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 62 63
88	Lack of Immediate Flight Control	ER18B52	The flight crew fail to apply any control following the loss of one engine	2; 3; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 63
	Flight crew misdiagnose which engine has failed	ER18B531	The flight crew misdiagnose which engine has failed and as a result make incorrect inputs to the controls	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 63
90	Flight crew apply incorrect controls	ER18B532	The flight crew apply immediate and continuing control that is incorrect following a single engine failure	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54 55; 58; 59; 60; 61; 63
VI	Flight crew fails to maintain control						0.5
91	Flight Control Surfaces Severely Damaged	ER18B611	The aircraft is rendered uncontrollable due to damage to the flight control surfaces following a single engine failure	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 5 55; 58; 59; 60; 61; 6
92	Aircraft Stalls	ER18B612	Due to the lack of thrust from one engine the aircraft is unable to maintain the speed required to generate sufficient lift and the	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 5- 55; 58; 59; 60; 61; 6:
93	Lack of Immediate Flight Control	ER18B62	aircraft stalls The flight crew fail to apply any control following the loss of one	2; 6; 9;	13; 14; 15; 16; 17; 18;	26; 27; 31; 33; 34; 35;	47; 48; 49; 50; 51; 5
		I	engine	I	19; 20; 21; 22; 23;	36; 37; 38; 39; 41; 42;	55; 58; 59; 60; 61; 6

			CATS ESD base Events and 05 ASC				
	Immediate & Continuing Control Incorrect	ER18B63	The momentary or continuous control by flight crew is inadequate after total power loss	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
	Aircraft unable to reach airport Aircraft fails to return to departure airport	ER18B71	The flight crew elect to return to the departure airport following total power loss but are unable to reach it	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
96	Aircraft fails to reach destination airport	ER18B72	The flight crew elect to continue to the destination airport following total power loss but are unable to reach it	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
97	Flight Crew unable to maintain control on approach	ER18B731	After electing divert to an alternate airport, the flight crew are unable to maintain control of the aircraft	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
98	Distance to airport greater than glide distance	ER18B732	The aircraft is too far from the airport to glide and has to make a forced landing	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
99	Diversion occurs too late	ER18B733	The flight crew decide to divert too late into the flight and as a result the aircraft fails to reach the airport. This can be due to the flight crew miscalculating fuel reserves of failing to declare an emergency in time	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
	Airport not suitable	ER18B734	The only available airport cannot be used as it is either too small or closed	2; 6; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 22; 23;	26; 27; 31; 33; 34; 35; 36; 37; 38; 39; 41; 42;	47; 48; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
	Unstable Approach						
	Poor manual flight control causes UA	AL19B111	An input to the aircraft's flight controls by flight crew results in the approach becoming destabilised, such as high sink rate, deviate above or below the glide slope, speed too fast/ slow, or aircraft not aligned with the centre line to the runway		15; 16; 17; 20; 23; 24; 25	26; 27; 32; 34; 35; 36; 38; 39;	50; 51; 54; 55; 58; 59; 61; 62;
2	Check list failure	AL19B1121	Flight crew fail to conduct briefings and checklists, which leads to a		16; 17;	26; 28; 29; 30;	50; 51; 59; 61; 62;
3	Improper control exchange	AL19B1122	CRM failure An exchange of control of the aircraft occurs at an inappropriate time during the approach or following an exchange of control, the		15; 16; 17; 19; 20; 23; 24; 25	26; 27; 29; 30; 32; 34; 35; 36; 38; 39;	50; 51; 54; 55; 58; 59; 60; 62;
4	Poor automated systems management causes UA	AL19B113	flight crew are unsure of their roles Flight crew use the flight management system inappropriately. Flight management system includes the Autopilot and auto throttle		15; 16; 17; 19; 20; 23; 24; 25	26; 27; 32; 34; 35; 36; 38; 39; 40;	47; 50; 51; 54; 55; 58; 59; 60; 62;
5	Loss of visual	AL19B121	systems among others Flight crew losses visual reference with the runway when not on an ILS approach		15; 16; 17; 19; 20; 23; 24; 25	26; 27; 32; 34; 35; 36; 38; 39;	47; 48; 50; 51; 52; 53; 56; 57; 58; 59; 60; 62; 63
	Severe turbulence	AL19B122	Turbulence is so severe that no control input will stabilise the approach		16; 18; 19; 20; 21; 23;	26; 31; 34; 35; 36; 39;	48; 50; 51; 54; 55; 58; 59; 60; 61; 62;
	Crosswind exceeded Flight crew fails to initiate and execute	AL19B123	Crosswind component for the aircraft is exceeded and it becomes unsafe for the aircraft to land		14; 16; 17; 23;	26; 35; 36; 39; 42;	48; 50; 51; 52; 53; 54; 55; 58; 59; 60; 61; 62;
"	missed approach						
8	Flight crew fail to recognise unstable approach	AL19B211	Both pilot and co-pilot fail to recognise the symptoms of an unstable approach and hence a missed approach is not initiated		14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
9	Crew fail to respond appropriately to unstable approach	AL19B212	Flight crew recognise the unstable approach but are not able to take appropriate action to initiate a missed approach		14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
10	AOA protection prevents MA	AL19B221	After initiating a missed approach, the AOA protection system activates and prevents the flight crew from executing the missed approach. AOA prevention system activates when the nose of the aircraft is pulled up sharply and is designed to prevent the aircraft from stalling		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	PF fails to execute correctly	AL19B222	Flight crew initiate a missed approach but fail to take appropriate action to execute the missed approach		14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Flight crew fails to maintain control Uncontrollable	AL19B31	No input to controls will allow the flight crew to maintain control of		13; 14; 15; 16; 17; 18;	26; 27; 28; 29; 30; 31;	47; 48; 50; 51; 52; 53;
			the aircraft after failing to initiate or execute a missed approach		19; 20; 21; 23; 24; 25	32; 34; 35; 36; 38; 39; 40; 41; 42;	54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Lack of control	AL19B32	The pilot makes no attempt to control the aircraft after failing to initiate or execute a missed approach		19; 20; 21; 23; 24; 25	40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Incorrect Control	AL19B33	The pilot applies incorrect control to the aircraft, after failing to initiate or execute a missed approach. This can be due to improper training, stress and fatigue		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Insufficient control	AL19B34	The pilot applies correct measures after failing to initiate or execute a missed approach, but these are not enough to maintain control		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Structural failure			-	40.44.55.55	00.07.07.77	47.40.55.55
	Structure too weak	AL19B41	Landing gear/structure is too weak due to manufacturing defect, improper maintenance or improper design	7;	13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Design load exceeded	AL19B42	Landing gear/structure is its designed strength but the excessive landing load causes failure	7;	13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Flight crew fail to maintain control	AL 10DE1	No input to controls will allow the Bi-bt counts are interested.	7.	13. 14. 15. 45. 47. 42	26, 27, 20, 20, 20, 21	47, 49, 50, 54, 53, 53
	Uncontrollable	AL19B51	No input to controls will allow the flight crew to maintain control of the aircraft after suffering structural failure caused by hard landing		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Lack of control	AL19B52	The pilot makes no attempt to control the aircraft after suffering structural failure caused by hard landing	7;	13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
20	Incorrect Control	AL19B53	The pilot applies incorrect control to the aircraft after suffering structural failure caused by hard landing. This can be due to improper training, stress and fatigue	7;	13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Insufficient control	AL19B54	The pilot applies correct measures after aircraft suffering structural failure caused by hard landing, but these are not enough to prevent aircraft leaving off the side of the runway	7;	13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Failure to achieve maximum braking Insufficient runway length	AL19B61	Runway can be too short under wet or icy runway conditions for plane to stop even if touchdown is successful and brakes are applied and functioning.		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63

1	Strategic conflict	ER31F53	Unmodified flight plan requests would lead to separation infringement		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 56 57; 59; 60; 61; 62; 63
2	Ineffective ATFCM	ER31B10	Failure of air traffic flow and capacity management (ATFCM) to		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 50
	No ATC planning	ED24D04	prevent strategic conflict developing into pre-tactical conflict		10.	22, 22, 24, 25,	57; 59; 60; 61; 62; 6
3	No ATC planning	ER31B91	No attempts are made to identify pre-tactical conflicts before they reach the Tactical Controller		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5 57; 59; 60; 61; 62; 6
	Inadequate strategic surveillance	ER31B9211	The radar picture is inadequate to allow the Planning Controller to		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5
	picture		identify the pre-tactical conflict, e.g. incomplete traffic picture, picture with overlapping labels, or too much traffic for the display system				57; 59; 60; 61; 62; 6
5	Inadequate flight plan data	ER31B9212	Flight plan data is inadequate to allow the Planning Controller to		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5
			identify the pre-tactical conflict, e.g. incorrect flight plan, flight plan insufficient to identify conflicts, flight plan strips obtained too late, or aircraft not following flight plan.				57; 59; 60; 61; 62; 6
	Planning controller failure to recognise	ER31B922	Planning Controller obtain correct flight information but fails to		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5
	conflict		recognise medium-term conflict. This includes failure of MTCD if present				57; 59; 60; 61; 62; 6
7	Planning controller misjudgement of	ER31B923	Planning Controller aware of the conflict but misjudges the traffic		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5
8	conflict prevention Inadequate planning controller	ER31B93	situation and results in an inadequate separation plan Planning Controller fails to coordinate with other sectors, resulting		19;	32; 33; 34; 35;	57; 59; 60; 61; 62; 6 47; 50; 51; 52; 53; 5
	coordination		in failure to implement planned traffic synchronisation				57; 59; 60; 61; 62; 6
	Planning controller failure to alert tactical controller to conflict	ER31B94	Planning Controller fails to inform Tactical Controller of a conflict		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5 57; 59; 60; 61; 62; 6
10	Inadequate tactical surveillance picture	ER31B5111	The radar picture is inadequate to allow the Tactical Controller to		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5
			maintain separation in a plannable conflict, e.g. incomplete traffic picture or picture with overlapping labels				57; 59; 60; 61; 62; 6
11	Inadequate flight plan data	ER31B5112	Flight plan data is inadequate to allow the Tactical Controller to		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5
			maintain separation in a plannable conflict, e.g. incorrect flight plan, flight plan insufficient to identify conflicts, flight plan strips				57; 59; 60; 61; 62; 6
			obtained too late, or aircraft not following flight plan.				
12	ATCO failure to recognise conflict	ER31B512	Tactical Controller obtains adequate flight information but fails to recognise the conflict		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5 57; 59; 60; 61; 62; 6
	ATCO misjudgement in tactical	ER31B513	Tactical Controller recognises the conflict, but misjudges the traffic		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5
	separation		situation and hence makes incorrect clearances or separation instructions to the aircraft				57; 59; 60; 61; 62; 6
14	Inadequate ATCO co-ordination	ER31B514	Tactical Controller fails to coordinate with other controllers,		19;	32; 33; 34; 35;	47; 50; 51; 52; 53; 5
15	Inadequate ATCO transmission of	ER31B521	resulting in incorrect clearances or separation instructions Inadequate transmission of instruction from ATCO, e.g. incorrect		19; 20;	32; 33; 34; 35;	57; 59; 60; 61; 62; 6 47; 50; 51; 52; 53; 5
	instructions		clearance, late clearance and unclear phraseology				57; 59; 60; 61; 62; 6
16	Loss of communication	ER31B522	Communication between ATCO and pilot is lost due to technical failure or human error		19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 54; 55; 5 59; 60; 61; 62; 63
17	Inadequate pilot readback	ER31B523	Failure of adequate readback from pilot and failure of ATCO to		19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 56; 57; 5
18	Inadequate pilot response to ATC	ER31B53	challenge the failure Flight crew fail to follow the clearances or separation instructions		19; 20; 21;	31; 32; 33; 34; 35;	60; 61; 62; 63 47; 50; 51; 59; 60; 6
19	Conflict due to military traffic	ER31F6111	Unauthorised penetration of controlled airspace by military traffic		19; 20; 21;	31; 32; 33; 34; 35;	62; 63 47; 50; 51; 56; 57; 5
20	Conflict due to VFR traffic	ER31F6112	Unauthorised penetration of controlled airspace by VFR (Visual		19; 20; 21;	31; 32; 33; 34; 35;	59; 60; 61; 62; 63 47; 50; 51; 56; 57; 5
21	Inadequate ATCO transmission of	ER31F61211	Flight Rule) traffic Inadequate transmission of instruction from ATCO that leads to a		19; 20; 21;	31; 32; 33; 34; 35;	59; 60; 61; 62; 63 47; 50; 51; 56; 57; 5
	instructions		vertical deviation of the aircraft				60; 61; 62; 63
22	Inadequate pilot readback	ER31F61212	Failure of adequate readback from pilot and failure of ATCO to challenge the failure that leads to a vertical deviation of the aircraft		19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 56; 57; 5 59; 60; 61; 62; 63
23	Pilot handling error	ER31F6122	Vertical deviation of aircraft due to pilot handling. This also includes cases of correct readback followed by incorrect action, failures to		19; 20; 21;	31; 32; 33; 34; 35;	47; 56; 57; 59; 60; 6 62; 63
24	Altimeter setting error	ER31F6123	follow SID or climb/ descent without clearance. Vertical deviation of aircraft due to inadequate altimeter settings		19; 20; 21; 25	27; 31; 32; 33; 34; 35;	47; 50; 51; 54; 55; 5
25	Technical failure in autopilot or nav	ER31F6124	Vertical deviation of aircraft due to technical failure in autopilot or	1. 2.	19; 20; 21;	39;	59; 60; 61; 62; 63 47; 50; 51; 54; 55; 5
25	equipment	EK31F0124	navigation equipment	1; 3;	19; 20; 21;	31; 32; 33; 34; 35;	57; 58; 59; 60; 61; 6
26	ACAS RA	ER31F6125	Response to ACAS Resolution Advisory or other in-flight emergency requiring a vertical deviation		19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 56; 57; 5 60; 61; 62; 63
27	Weather induced level bust	ER31F6126	Vertical deviation resulting from weather conditions		19; 20; 21;	31; 32; 33; 34; 35;	47; 48; 50; 51; 54; 5 56; 57; 58; 59; 60; 6
28	Level bust results in conflict	ER31C6	Given a level bust occurs, the aircraft has separation infringement		19; 21;	31; 32; 33; 34; 35;	62; 63 47; 48; 50; 51; 56; 5
			with another aircraft				58; 59; 60; 61; 62; 6
	Inadequate tactical surveillance picture	ER31B611	The radar picture is inadequate to allow the Tactical Controller to maintain separation in an unplannable conflict, e.g. missing or unidentified targets		19; 20;	32; 33; 34; 35;	47; 50; 51; 54; 55; 5 57; 58; 59; 60; 61; 6 63
	ATCO failure to recognise conflict in time	ER31B612	ATCO fails to recognise the unplannable conflict in time to issue separation instructions		19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 56; 57; 5 60; 61; 62; 63
	Inadequate ATCO transmission of	ER31B621	Inadequate transmission of instruction for an unplannable conflict from ATCO results in failure to maintain separation		19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 56; 57; 5
32	instructions Loss of communication	ER31B622	Communication between ATCO and pilot is lost during an		19; 20; 21;	31; 32; 33; 34; 35;	60; 61; 62; 63 47; 50; 51; 54; 55; 5
			unplannable conflict due to technical failure or human error				57; 58; 59; 60; 61; 6 63
	Inadequate pilot readback	ER31B623	Failure of adequate readback from pilot during an unplannable conflict and failure of ATCO to challenge the failure		19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 56; 57; 5 60; 61; 62; 63
	Inadequate pilot response to ATC	ER31B63	Flight crew fail to follow the clearances or separation instructions		19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 56; 57; 5 60; 61; 62; 63
35	Trajectory instructions result in conflict	ER31F71	Trajectory instructions from ATCO create a conflict that was not previously present		19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 56; 57; 5 60; 61; 62; 63
_	Ineffective tactical separation of ATCO	CD24D7	ATCO does not recognise or resolve the conflict they have created		19; 20; 21;	31; 32; 33; 34; 35;	47; 50; 51; 56; 57; 5

	Unstable Approach Poor manual flight control causes UA	AL19B111	An input to the aircraft's flight controls by flight crew results in the		15; 16; 17; 20; 23; 24;	26; 27; 32; 34; 35; 36;	50; 51; 54; 55; 58; 59
-		71233211	approach becoming destabilised, such as high sink rate, deviate above or below the glide slope, speed too fast/ slow, or aircraft not		25	38; 39;	61; 62;
2	Check list failure	AL19B1121	aligned with the centre line to the runway Flight crew fail to conduct briefings and checklists, which leads to a		16; 17;	26; 28; 29; 30;	50; 51; 59; 61; 62;
3	Improper control exchange	AL19B1122	CRM failure An exchange of control of the aircraft occurs at an inappropriate		15; 16; 17; 19; 20; 23;	26; 27; 29; 30; 32; 34;	50; 51; 54; 55; 58; 59
	, , , , , , , , , , , , , , , , , , ,		time during the approach or following an exchange of control, the flight crew are unsure of their roles		24; 25	35; 36; 38; 39;	60; 62;
4	Poor automated systems management causes UA	AL19B113	Flight crew use the flight management system inappropriately. Flight management system includes the Autopilot and auto throttle systems among others		15; 16; 17; 19; 20; 23; 24; 25	26; 27; 32; 34; 35; 36; 38; 39; 40;	47; 50; 51; 54; 55; 58 59; 60; 62;
5	Loss of visual	AL19B121	Flight crew losses visual reference with the runway when not on an ILS approach		15; 16; 17; 19; 20; 23; 24; 25	26; 27; 32; 34; 35; 36; 38; 39;	47; 48; 50; 51; 52; 53 56; 57; 58; 59; 60; 62 63
6	Severe turbulence	AL19B122	Turbulence is so severe that no control input will stabilise the approach		16; 18; 19; 20; 21; 23;	26; 31; 34; 35; 36; 39;	48; 50; 51; 54; 55; 58 59; 60; 61; 62;
7	Crosswind exceeded	AL19B123	Crosswind component for the aircraft is exceeded and it becomes unsafe for the aircraft to land		14; 16; 17; 23;	26; 35; 36; 39; 42;	48; 50; 51; 52; 53; 54 55; 58; 59; 60; 61; 62
II	Flight crew fails to initiate and execute missed approach						
8	Flight crew fail to recognise unstable approach	AL19B211	Both pilot and co-pilot fail to recognise the symptoms of an unstable approach and hence a missed approach is not initiated		14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
9	Crew fail to respond appropriately to unstable approach	AL19B212	Flight crew recognise the unstable approach but are not able to take appropriate action to initiate a missed approach				
10	AOA protection prevents MA	AL19B221	After initiating a missed approach, the AOA protection system		13; 14; 15; 16; 17; 18;	26; 27; 28; 29; 30; 31;	47; 48; 50; 51; 52; 53
			activates and prevents the flight crew from executing the missed approach. AOA prevention system activates when the nose of the aircraft is pulled up sharply and is designed to prevent the aircraft from stalling		19; 20; 21; 23; 24; 25	32; 34; 35; 36; 38; 39; 40; 41; 42;	54; 55; 56; 57; 58; 59 60; 61; 62; 63
11	PF fails to execute correctly	AL19B222	Flight crew initiate a missed approach but fail to take appropriate action to execute the missed approach		14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Flight crew fails to maintain control						
12	Uncontrollable	AL19B31	No input to controls will allow the flight crew to maintain control of the aircraft after failing to initiate or execute a missed approach		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59 60; 61; 62; 63
13	Lack of control	AL19B32	The pilot makes no attempt to control the aircraft after failing to initiate or execute a missed approach		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59 60; 61; 62; 63
14	Incorrect Control	AL19B33	The pilot applies incorrect control to the aircraft, after failing to initiate or execute a missed approach. This can be due to improper training, stress and fatigue		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59 60; 61; 62; 63
15	Insufficient control	AL19B34	The pilot applies correct measures after failing to initiate or execute a missed approach, but these are not enough to maintain control		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59 60; 61; 62; 63
IV	Structural failure					40, 41, 42,	00, 61, 62, 63
16	Structure too weak	AL19B41	Landing gear/structure is too weak due to manufacturing defect, improper maintenance or improper design	7;	13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39;	47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59
17	Design load exceeded	AL19B42	Landing gear/structure is its designed strength but the excessive landing load causes failure		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	40; 41; 42; 26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39;	60; 61; 62; 63 47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59
			and any load causes former		13, 20, 21, 23, 21, 23	40; 41; 42;	60; 61; 62; 63
	Flight crew fail to maintain control Uncontrollable	AL19B51	No input to controls will allow the flight crew to maintain control of	7.	13, 14, 15, 16, 17, 19,	26; 27; 28; 29; 30; 31;	47; 48; 50; 51; 52; 53
10	Oncontrollable	ALISBSI	the aircraft after suffering structural failure caused by hard landing	7,	13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	32; 34; 35; 36; 38; 39; 40; 41; 42;	54; 55; 56; 57; 58; 59 60; 61; 62; 63
19	Lack of control	AL19B52	The pilot makes no attempt to control the aircraft after suffering structural failure caused by hard landing	7;		26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39;	47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59
20	Incorrect Control	AL19B53	The pilot applies incorrect control to the aircraft after suffering	7;	13; 14; 15; 16; 17; 18;	40; 41; 42; 26; 27; 28; 29; 30; 31;	60; 61; 62; 63 47; 48; 50; 51; 52; 53
20	mediteet control	ALISUSS	structural failure caused by hard landing. This can be due to improper training, stress and fatigue	<i>'</i> ,	19; 20; 21; 23; 24; 25	32; 34; 35; 36; 38; 39; 40; 41; 42;	54; 55; 56; 57; 58; 59 60; 61; 62; 63
21	Insufficient control	AL19B54	The pilot applies correct measures after aircraft suffering structural	7;	13; 14; 15; 16; 17; 18;	26; 27; 28; 29; 30; 31;	47; 48; 50; 51; 52; 53
	Fellowski		failure caused by hard landing, but these are not enough to prevent aircraft leaving off the side of the runway		19; 20; 21; 23; 24; 25	32; 34; 35; 36; 38; 39; 40; 41; 42;	54; 55; 56; 57; 58; 59 60; 61; 62; 63
	Failure to achieve maximum braking Insufficient runway length	AL19B61	Runway can be too short under wet or icy runway conditions for		13; 14; 15; 16; 17; 18;	26; 27; 28; 29; 30; 31;	47; 48; 50; 51; 52; 53
22	insufficient runway length	AL19861	plane to stop even if touchdown is successful and brakes are applied and functioning.		19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	54; 55; 56; 57; 58; 59 60; 61; 62; 63
23	Brakes not functioning correctly	AL19B62	Brakes are not giving maximum braking, i.e. because of improper maintenance and damages	7; 9;	13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59 60; 61; 62; 63
	Brakes not applied correctly	AL19B63	Flight crew's failure to arm spoilers during the approach or apply on touchdown, failure in CRM leading to brakes not being applied, failure to apply brakes soon after touchdown, disengaging brakes during landing roll		13; 14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 41; 42;	47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59 60; 61; 62; 63
	Flight crew fail to maintain control Uncontrollable	AL19B71	No input to controls will allow the flight crew to maintain control of the aircraft after executing a missed approach		14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 42;	47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59 60; 61; 62; 63
26	Lack of control	AL19B72	The pilot makes no attempt to control the aircraft after executing a missed approach		14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 42;	47; 48; 50; 51; 52; 53 54; 55; 56; 57; 58; 59 60; 61; 62; 63
27	Incorrect Control	AL19B73	The pilot applies incorrect control to the aircraft after executing a missed approach. This can be due to improper training, stress and fatigue		14; 15; 16; 17; 18; 19; 20; 21; 23; 24; 25	26; 27; 28; 29; 30; 31; 32; 34; 35; 36; 38; 39; 40; 42;	47; 48; 50; 51; 52; 53; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63

			The state of the s			
28	Insufficient control	AL19B74	The pilot applies correct measures after executing a missed	14; 15; 16; 17; 18; 19;	26; 27; 28; 29; 30; 31;	47; 48; 50; 51; 52; 53;
			approach but are not enough to prevent aircraft leaving off the side	20; 21; 23; 24; 25	32; 34; 35; 36; 38; 39;	54; 55; 56; 57; 58; 59;
			of the runway		40; 42;	60; 61; 62; 63
VIII	Insufficient fuel available for next					
	approach					
29	Flight crew fail to notify ATC of	AL19B811	Flight crew do not inform the ATC that the fuel reserve is not	14; 15; 16; 17; 18; 19;	26; 27; 28; 29; 30; 31;	47; 48; 50; 51; 52; 53;
	inadequate reserves		sufficient for aircraft to perform the next approach	20; 21; 23; 24; 25	32; 34; 35; 36; 38; 39;	54; 55; 56; 57; 58; 59;
					40; 42;	60; 61; 62; 63
30	Poor flight planning	AL19B8121	Inadequate amount of reserved fuel in aircraft due to poor flight	14; 15; 16; 17; 18; 19;	26; 27; 28; 29; 30; 31;	47; 48; 50; 51; 52; 53;
			planning	20; 21; 23; 24; 25	32; 34; 35; 36; 38; 39;	54; 55; 56; 57; 58; 59;
					40; 42;	60; 61; 62; 63
31	Aircraft diverted from other location	AL19B8122	Aircraft consumes extra fuel during flight due to a route diversion	14; 15; 16; 17; 18; 19;	26; 27; 28; 29; 30; 31;	47; 48; 50; 51; 52; 53;
				20; 21; 23; 24; 25	32; 34; 35; 36; 38; 39;	54; 55; 56; 57; 58; 59;
					40; 42;	60; 61; 62; 63
32	Aircraft executes multiple MA	AL19B82	Aircraft has already performed one or more missed approach	14; 15; 16; 17; 18; 19;	26; 27; 28; 29; 30; 31;	47; 48; 50; 51; 52; 53;
			previously, and hence the reserved fuel is not sufficient to perform	20; 21; 23; 24; 25	32; 34; 35; 36; 38; 39;	54; 55; 56; 57; 58; 59;
			the next approach		40; 42;	60; 61; 62; 63

	Aircraft System Failure	T004044		4.2.0	40.40.04.00	24.44	50 54 54 55 50 50
	Autoflight Failure	TO01B11 TO01B12	Failure of any of the systems associated with the autopilot and auto throttle	1; 3; 9;	13; 18; 21; 22; 11; 18; 19; 20; 21; 22;	31; 41;	50; 51; 54; 55; 58; 59; 60; 61; 62; 63
2	Communications Failure	1001812	Failure of any communications equipment such that the crew are unable to communicate with ATC		11; 18; 19; 20; 21; 22;	31; 32; 33; 43;	45; 47; 50; 51; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
3	Electrical Power Failure	TO01B13	Failure of any of the power supplies such that any critical system fails	1; 2; 3; 8;	13; 14; 15; 19; 20; 22;	32; 33; 34; 35;	47; 50; 51; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
4	Fire Protection Failure	TO01B14	Failure of the system designed to warn of and extinguish any fire within the aircraft.		13; 14; 22;	41; 42;	50; 51; 54; 55; 58; 59; 60; 61; 62; 63
5	Hydraulic Power Failure	TO01B15	Failure of any of the hydraulic systems	3; 5; 7;	13; 14; 22;	41; 42;	50; 51; 54; 55; 58; 59; 60; 61; 62; 63
	Indicating and Recording System Failure	TO01B16	Failure of any of the flight instruments critical for safe flight	3;	13; 14; 22;	41; 42;	47; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
7	Navigation System Failure	TO01B17	Failure of any of the navigation systems	8;	15; 18; 19; 20; 21;	31; 32; 33; 34; 35; 36; 37; 38; 39;	47; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
8	Auxiliary Power Unit Failure	TO01B18	Failure of a critical part of the APU leading to failure of the APU itself	2;			50; 51; 54; 55; 58; 59; 60; 61; 62; 63
9	Flap Systems Failure	TO01B19	Failure of flap systems	3; 5;	13; 14; 22;	36; 37; 38; 39; 41; 42;	50; 51; 54; 55; 58; 59; 60; 61; 62; 63
10	Drag Control Systems Failure	TO01B110	Failure of drag control systems	3;	13; 14; 22; 24;	28; 41; 42;	50; 51; 54; 55; 58; 59; 60; 61; 62; 63
11	Landing Gear Systems Failure	TO01B111	Failure of landing gear systems	7;	23;	26; 29;	50; 51; 54; 55; 58; 59; 60; 61; 62; 63
12	Pneumatic Systems Failure	TO01B112	Failure of pneumatic systems	3; 9;	13; 21;	41;	50; 51; 54; 55; 58; 59; 60; 61; 62; 63
13	Door Systems Failure	TO01B113	Failure of door systems		18; 21;	31; 32; 33; 34; 35;	47; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63
14	Other Systems Failures	TO01B114	Failure of other systems that may cause take-off rejection	4; 6;	22;		50; 51; 54; 55; 58; 59; 60; 61; 62; 63
	Take-off Rejection by Flight Crew						
15	Pilot Misdiagnosis	TO01B211	The pilot either fails to realise the failure or diagnoses the failure as something else, perhaps more serious and as a result aborts the take-off	1; 2; 3; 4; 5; 6; 7; 8; 9;	11; 13; 14; 15; 18; 19; 20; 21; 22; 23; 24;	26; 28; 29; 31; 32; 33; 34; 35; 36; 37; 38; 39; 41; 42; 43;	45; 47; 50; 51; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
16	Pilot Misjudgement	TO01B212	The pilot diagnoses the aircraft system failure but misjudges the situation and incorrectly aborts the take-off	1; 2; 3; 4; 5; 6; 7; 8; 9;	11; 13; 14; 15; 18; 19; 20; 21; 22; 23; 24;	26; 28; 29; 31; 32; 33; 34; 35; 36; 37; 38; 39; 41; 42; 43;	45; 47; 50; 51; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Take-off rejected correctly when below V1	TO01B22	If the take-off is rejected when the aircraft is below V1 then this is a success, but it must be included to obtain the pivotal event probability	1; 2; 3; 4; 5; 6; 7; 8; 9;	11; 13; 14; 15; 18; 19; 20; 21; 22; 23; 24;	26; 28; 29; 31; 32; 33; 34; 35; 36; 37; 38; 39; 41; 42; 43;	45; 47; 50; 51; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
	Failure to Achieve Maximum Braking Insufficient Runway Length	TO01B31	The runway can be too short under wet or icy runway conditions for	1. 7. 2. 4. 5. 6. 7. 9. 0.	11; 13; 14; 15; 18; 19;	26; 28; 29; 31; 32; 33;	45; 47; 50; 51; 54; 55;
18	Insumicient Runway Length	1001831	the plane to come to a halt even if the take-off is aborted before V1 is reached	1; 2; 3; 4; 5; 6; 7; 8; 9;	20; 21; 22; 23; 24;	26; 28; 29; 31; 32; 33; 34; 35; 36; 37; 38; 39; 41; 42; 43;	56; 57; 58; 59; 60; 61; 62; 63
19	Brakes not functioning correctly	TO01B32	The braking systems are improperly maintained or damaged during the take-off roll	1; 2; 3; 4; 5; 6; 7; 8; 9;	11; 13; 14; 15; 18; 19; 20; 21; 22; 23; 24;	26; 28; 29; 31; 32; 33; 34; 35; 36; 37; 38; 39; 41; 42; 43;	45; 47; 50; 51; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63
20	Brakes not applied correctly	TO01B33	Failure of the flight crew to apply all the braking systems immediately after take-off rejection	1; 2; 3; 4; 5; 6; 7; 8; 9;	11; 13; 14; 15; 18; 19; 20; 21; 22; 23; 24;	26; 28; 29; 30; 31; 32; 33; 34; 35; 36; 37; 38; 39; 41; 42; 43;	45; 47; 50; 51; 54; 55; 56; 57; 58; 59; 60; 61; 62; 63

Lack of adherence to ICAO Annex 14 SARPs in terms of RWY mainternance - presence of 216 contaminations. Incorrect stab-trim setting 258 nadequate certification process and / or flaws in methodology concerning verification of the system / product compliance with requirements - Landing gear components Slow rotation (i.e., low pitch rate) 371 Lack of adherence to SARPs included in ICAO Annex 14 in terms of airport fence 401 integrity monitoring Lack of adherence to SOP for take-off procedure in terms of speed bug checklist 419 preparation and verification. Inadequate certification process and / or flaws in methodology concerning verification 420 of the system / product compliance with requirements - FCS system or components Flaws in manufacturer quality control process - FCS system components Flaws in aircraft system maintenance process definition - FCS systems or components 422 Flaws in aircraft system maintenance process definition - Landing gear components 377 Flaws in manufacturer quality control process - Landing gear components. 376 18 TO10B42 Pilot tiredness - Inadequate workload distribution 167 3; 7; 22; 49; 50; 51; 54; 55; 58; 59; 60; 61; 62; 63 Flaws in pilot requirements definition process and/or training methodology 168 Poor application of T/O & RTO procedure, aircraft handling 388 Wildlife incursion System failure affecting the operation of primary instruments / displays or standby 26 instruments 34 Bird strike Contaminated Runway 39

Code	Identifiable precursors	No.	SPIs: Technology	SPIs: Human	SPIs: Organisation	Organisations
	Tire burst	80				
	Flaws in maintenance technician / airworthiness specialist requirements definition	149				
	process and/or training methodology					
	Maintenance technician / airworthiness specialist tiredness - Inadequate workload	150				
	distribution					
	Lack of adherence to the SOP in terms of PNF flight parameters / situation monitoring	151				
	or / and passive contribution to the PF duties					
	Lack of adherence to ICAO Annex 14 SARPs. Poor or inefficient bird hazard reduction	162				
	procedure					
	Pilot tiredness - Inadequate workload distribution	167				
	Flaws in pilot requirements definition process and/or training methodology	168				
	Lack of adherence to SOP for take-off procedure in terms of determining of aircraft	198				
	configuration.					
	Lack of adherence to SOP for take-off procedure in terms of checking take-off	201				
	configuration before application of take-off power.					
	Lack of adherence to ICAO Annex 14 SARPs in terms of RWY mainternance - presence of	216				
	contaminations.					
	Incorrect stab-trim setting	258				
	Inadequate certification process and / or flaws in methodology concerning verification	358				
	of the system / product compliance with requirements - Landing gear components					
	Slow rotation (i.e., low pitch rate)	371				
	Lack of adherence to SARPs included in ICAO Annex 14 in terms of airport fence	401				
	integrity monitoring					
	Lack of adherence to SOP for take-off procedure in terms of speed bug checklist	419				
	preparation and verification.					
	Inadequate certification process and / or flaws in methodology concerning verification	420				
	of the system / product compliance with requirements - FCS system or components
